Provincial Library Dec 21 20

VOL. XXIX, No. 20

DIDSBURY, ALBERTA, THURSDAY, MAY 19, 1932

\$2.00 per Year. 5 cents a copy

## Didsbury Pioneer Passes Away

In the passing of Grandma Cressman, who died at her home on Friday, May 13th, Didsbury lost one of the oldest pioneers. Mrs. Cressman had been ailing for about a year and in January she suffered a stroke from which she never recovered.

Mrs. Cressman came here with her family in 1899 when the district was just opening up for settlement and lived to see the district developed from the raw prairie to a prosperous farming district.

Angeline Bingham Cressman was born Aug. 6, 1852 in Oxford county, the village of Washington, Ont., and died May 13th, 1932, aged 79 years, 9 months, 7 days.

Angeline Bingham was married to Samuel C. Cressman on Sept. 13th, 1873. This union was blessed with twelve children.

Mr. and Mrs. Cressman and family moved to Alberta in 1899 and have resided here ever since.

She leaves to mourn her loss four daughters, Mrs. Allan Hunsberger, Didsbury; Mrs. J. W. Ryckman, Bellingham; Mrs. R. D. Curdy, Drumheller; Miss Zella Cressman, Didsbury; six sons, Milo, of Staveloy; Morgan, Didsbury; Bruce of Raven; Douglas of Delia and Bert of Didsbury; also 33 grandchildren and 9 great grandchildren. Her husband, a daughter and a son preceded her.

The funeral services were held at the M.B.C. Church on Sunday and were very largely attended. Rev. W. K. Snyder conducted the services assisted by Rev. J. Harder. The pall bearers, who were all oddimers, were Messrs. Theo. Reist, Amos Weber, Norman Snyder, Norman Buschert, Elah Shantz, and Ben Rosenberger.

All Mrs. Cressman's children, except Mrs. Ryckman were able to be present at the funeral. The other relatives from outside points who attended were: Mrs. C. Bell and children and Wilfred Curdy, of Drumheller; Gerard Curdy, Claude Cressman, Alice Cressman, Edna and Allen Knoepfli, of Calgary; Miss Verda Cressman, Staveloy; Howard Herber, Raven, and Mrs. Alex McInnis of Trecho.

## LOCAL & GENERAL

"Let's dance every Saturday in Olds." Wong's Theatre. Everybody 25c. Good music.

Miss Marie Chambers, of Calgary is visiting at her home here this week.

Mr. C. H. Adshad was a business visitor to Calgary and Turner Valley on Monday.

Mr. and Mrs. J. Boorman spent a couple of days in Calgary last week.

J. W. Halton motored to Calgary Tuesday to take in the Chicago-Edmonton Grade basketball game.

Dr. and Mrs. Clarke and family are visiting at Edmonton this week. Dr. Clarke is attending a medical clinic at the University.

Miss Marie Cameron, of Calgary was a visitor at the home of Mr. and Mrs. W. G. Liesemer over the weekend.

Pete Miquelon made a trip to Three Hills Saturday evening. He reports that there was a big rain storm in that district.

Mr. and Mrs. Chas. Mortimer and Mr. C. R. Ford and Miss Roy Clements made a picnic trip to the Raven River on Sunday.

Miss Helen Shantz, of Calgary was visiting with Misses Lucille and Laura Smith for a few days last week.

The Clydesdale Horse Association are again offering a gold medal for the best purebred Clydesdale mare shown at Didsbury Fair.

We notice that a number of the younger folk are getting up at 6 a.m. to play tennis. We have been asked what their big idea is.

Mrs. G. Smith, Mrs. F. Kaufman, Misses Lucille and Laura Smith and Miss Annie Pelechaty enjoyed an outing to Calgary on Thursday last.

Bill McFarquhar was a Calgary visitor last week. Bill is driving a car these days and says it is a big improvement on a team of mules. He also says the roads to Calgary are fine.

J. Tren, who was charged at the Calgary Assizes with stealing feed grinders which he disposed of in the Didsbury district, was given twelve months' suspended sentence.

The Business Girls' Club met last week at the Nurses' Home. Miss Terry acting as hostess. Bridge was played and the prize was won by Mrs. Hugh Lee, who was a guest of the Club.

The Quarterly Communion Service will be held Sunday morning at Zion Evangelical Church. Rev. W. W. Krueger, of Regina will preach. In the evening the pastor's sermon will be: "The Kingdom of God."

Mr. Charles Reed, son of Mr. J. Reed, of Vancouver, a former resident of Didsbury, is visiting at the home of Mr. and Mrs. W. S. Durrer. Mr. Reed has been attending the University of Saskatchewan at Saskatoon.

Mr. Jim Duffy, who has been conducting a tailoring establishment here for the past year, left for Vancouver on Wednesday, where he expects to market the special shirt he patented. He was accompanied by Mr. Dan Windsor, who is going to visit with his son.

A party from Didsbury are planning a prospecting trip to the country north-west of Burns Lake, B.C. They propose to take pack horses and outfit to Jasper and ship the outfit from there to Burns Lake, where they will pack into the north country.

The Fourth Quarterly Conference of the Didsbury Circuit of the Evangelical Church will be held in the Didsbury church on Saturday evening at 8 o'clock. Rev. W. W. Krueger, the district superintendent will preside. Yearly reports will be submitted and arrangements made for the Annual Conference at Medicine Hat, from June 8th to 12th.

Stores will be open Monday evening, also Wednesday afternoon next week.

## Errata:

In the Halliday Advt. the item for Pure Red Plum Jam should read: "3 Cans for \$1.00." It was a printer's error.

## U.F.A.'s Hold Joint Meeting

On Monday evening of last week a joint meeting of three local U.F.A. branches was held at the Community Hall. Mr. Norman Priestley spoke on "Co-operative Burying." It was decided to organize an Association on the "Coronation Plan," and an organization meeting will be held on June 11th in Didsbury.

## Canadian Legion Field Day, June 3

The Canadian Legion are planning their 2nd annual Field Day and Sports at the Fair Grounds on Friday, June 3rd.

They are arranging for a big day with a full line of sports for both young and old in addition to a softball tournament for local teams.

The Legion will present an episode of frontier days, "The Lucky Nugget."

Coffee will be served free at noon to all those who wish to picnic in the grove, and free ice cream will be served to the children. The day will be wound up with a big dance in the Opera House at 8:30 p.m.

June 3rd has been declared a civic half holiday and all business houses will be closed for the Field Day.

## Local Writer Attains Success

Mrs. Norman Bowles, of Jutland teachers, is to be congratulated on her success as a writer. Mrs. Bowles has sold four stories during the past month to such well known papers as The Family Herald and the Winnipeg Free Press. She specializes on stories of Queen Victoria. The late queen was visited at the home of Mrs. Bowles' grandmother on many occasions while at her home at Balmoral, and as a child Mrs. Bowles remembers her visits to the school.

## AT BERSCHT'S

Men's Holeproof Autogart Socks, reg. 75c. 2 pr. \$1.00

## Fishing Season Opens.

The open season for fish stories commenced Monday and the boys are already telling them.

On Monday, at least two parties went out to try and coax a few trout onto their hooks. Bill McFarquhar, Geo. Julien and a travelling friend went to the Fallen Timber Creek and George came back with having hooked four nice trout, but Bill says it was a lean place to fish.

Jack Fleury headed another party as far out as Coal Camp and came back with a nice catch. They say the other party held the championship.

## Wins Guessing Contest.

Mrs. Frank McDonald was the lucky winner of the Congregational guessing contest conducted by the Builders' Hardware last week. The hidden number on the ring was 4294 and Mrs. McDonald's guess was 4310. Jimmy Halton headed the list of unlucky guessers, his guess being 1321.

Harold Hardy made a business trip to Calgary Monday and Tuesday.

What shall we do Saturday night? Where, dance at the Opera House. It's only 25c. and good music too.

There will be services at Bethel Evangelical Church at Westcott on Sunday afternoon at 2 o'clock.

Mr. W. D. Lowden, Tip Top Specialty Man will be at Ranton's Thursday, June 2nd with new samples and new low prices.

Ripping the roof from modern life, revealing its drama and hypocrisy, and whirling you around two hours of the clock. "24 Hours" at the Opera House tonight (Thurs.)

Rev. A. J. Mitchell will resume his duties at Knox United Church on Sunday, May 22nd at 7:30 p.m. The congregation will be pleased to have Mr. Mitchell back again.

"The Painted Desert," a story of a man who possessed the liquid wealth of a desert water hole. Meet two hard bitten desert riders who have searched together for gold without success. This big feature will be shown at the Opera House Monday and Thursday next week.

Russell, J. W. Philligan.

## Teamwork

The one word or term embodying the thing most needed now and most likely to be needed in an increasing way for the long pull back to more satisfactory economic and business conditions is, in our opinion, "Teamwork." If there ever was a time which called for "the long pull and the strong pull altogether," that time is now.

A farmer following his horses as he guides a plough along the furrows knows what teamwork on the part of the horses means; also teamwork between the horses and the ploughman. Possibly he realizes the full value and necessity of such teamwork in an even more striding manner when it is lacking, and as the outcome, proper results are not being achieved.

Men participating in the many fields of sport have a full appreciation of the value of teamwork. Every successful captain of a team drills it into his men. But how frequently one reads that such-and-such a team, while composed of brilliant and superior individual players, lost out to an individually inferior team because of a lack of co-ordinated effort, in a word, teamwork. And this lack of teamwork all too frequently results because one or more of these individually brilliant players desire to keep themselves in the "spotlight," play to the gallery, and win plaudits for themselves rather than for the team as a whole.

Success in military exploits depends to a very large extent upon teamwork, the co-ordination of every arm of the service to the achievement of one common object, the co-operation of each unit with every other unit, both in preparation and final action, to the end that victory be won. Without this "union in service" the bravest men in the world are likely to suffer defeat at the hands of an inferior but more unified force. Victory does not always rest with the big battalions, but with the compact body which moves and acts with precision as one man.

The same principle applies with equal truth and power in the realm of national, political, and community life. If in an army the artillery considered that it, and it alone, was the effective instrument in winning battles, and instead of co-operating with the infantry, tanks, machine-gunners and aircraft, actually ignored and even strove against them, the enemy would win. Yet how often groups of people having a common object in community effort or in the political arena instead of working together to achieve that object, actually oppose each other solely because they do not agree upon every detail of their programme, nor see eye to eye as to the methods by and through which the reforms desired by all are to be brought about. And the result, of course, is victory for the other group or policy to which they are opposed.

There are many time-honoured maxims which point the truth that teamwork is essential to success. "In union there is strength," "United we stand, divided we fall"; while for the enemy forces there is always the further maxim, "Divide and rule."

Teamwork can only be brought about by a willingness to compromise. Some good people regard the word "compromise" as something essentially wrong, as a great evil. True, right cannot compromise with wrong, nor honesty with dishonesty, but where two are striving for what both believe to be right, and in opposition to what they are agreed is unwise or wrong, it is the height of folly to divide into separate and opposing camps, weakening each other and the cause they both desire to advance, simply because of minor differences of opinion as to exact objective to be achieved or the methods by which it shall be achieved. Unless there is compromise, rather than each one insisting upon acceptance of their views to the exclusion of others, failure for both must inevitably follow and victory be recorded for the common enemy.

The experiences through which the world is passing have impressed a majority of people with the need for more or less radical changes in our economic and social structure. That change is necessary is fairly well recognized, but some desire to move much more rapidly and drastically than others; some believe the remedy for our ills is to be found in another policy; others, again, advocate something else. All want improvement, reform. But through divided councils, lack of co-operation, in a word, an absence of teamwork, nothing but confusion has thus far resulted, while those minorities who are more or less satisfied with things as they are, by working together, are enabled to dominate.

This condition prevails in society, business, community effort, in municipal, provincial, and international politics. It is even found in family life. It is fatal to progress, a continually delaying factor in the onward march of reform.

What the world needs today is not antagonism, but mutual sympathy; not competition, but co-operation; not isolated effort, but co-ordination of effort; not single-handed play, but teamwork. And these things can only be brought about by compromise. So let's compromise and develop mutual strength through teamwork. The world will then begin to get somewhere, and out of the slough of depression in which it continues to founder.

### Too Bad For The Wife

A farmer appeared the other day at a theatre that is accepting two dozen eggs as the price of admission. He handed a paper sack to the ticket-taker.

"There's a couple of dozen eggs, mister," he said. "I want to see your show. I'd have brought the misuses with me if the hens had shelled out a little better."

Worms are encouraged by moist condition of the stomach and bowels, and so subside. Miller's Worm Powders will after these conditions almost immediately and will sweep the worms away. No destructive parasite can live in contact with this medicine, which is not only a worm destroyer, but a health-giving medicine most beneficial to the young constitution.

The Moonmouth vehicle to pass through the Holland Tunnel of New York was recently counted.

Poison ivy is most virulent at the flowering season.

Price 50c a box

### Paipation of the Heart Could Hardly Get Around

Mrs. Charles Storm, R.R. & Eaton, Ont., writes: "I was troubled with paipation of the heart, couldn't sleep, day or night, and was so weak I could hardly get around."

After taking Milburn's Heart and Nerve Pills I was greatly relieved of these attacks.

My mother also has great faith in them and tries to order medicine can help her so much for heart trouble.

I can assure you that Milburn's Heart and Nerve Pills are a wonderful builder.

Sold at all drug and general stores, or mailed direct on receipt of price by The T. Milburn Co., Ltd., Toronto, Ont.

### Called His Bluff

The time had come to die up the ratings, and in an Irish regiment the quartermaster and his assistant had been portioning them out in preparation for distribution.

The assistant turned to the quartermaster and, with a twinkle in his eye, said: "Ay ye plaze, sorr, there's a loaf short. Who'll I give it to?"

"Keep it yourself," Mike replied the quartermaster.

### China Leading Customer

China is the leading customer for complete aircraft made in the United States. In both 1930 and 1931 China held the lead over all other countries. The Chinese like American machines because their territory bears a remarkable similarity in flying conditions to those in the United States.

Suffering in silence is more fun if you explain what you're doing so nobody will miss it.

### Keep On Working

Despite Disarmament Talk New War Weapons Being Invented

Just as a fillip to the disarmament discussions, we suppose you noticed that Huthfields, Limited, munition manufacturers of St. Field, England, have developed a high explosive shell that will pierce the best quality of armor plate one foot thick, from a distance of ten miles.

While the world talks much of disarming, the men who sit back and invent new schemes for killing millions keep right on working, and producing results.

### Down in Weight and Very Pale

Mrs. Beare Thankful For Way in Which Dr. Williams' Pink Pills Helped Her Back To Health

Gained Weight and Color

"I can truly recommend Dr. Williams' Pink Pills for they did wonders for me," writes Mrs. Mable R. Beare, New Westminster, B.C. "After a long and very trying illness, I was down to 90 lbs. in weight. I could not eat a hearty meal. In fact, I have had to go away from the table hungry, from a dinner I dared not touch. I was about Dr. Williams' Pink Pills so I thought I would give them a trial. I soon found I was able to eat with any one, and life began to look brighter. My weight came up to 118 lbs. and my lips and cheeks had lots of color. I am more than thankful I ever took Dr. Williams' Pink Pills, and I only hope others will try them." Dr. Williams' Pink Pills actually create an abundance of new red blood, which is the reason they have given new vitality and strength to thousands of such nervously exhausted women. Equally helpful for growing girls. Try them. At your drug-gist's in the new glass container, 50c.

### The First Bicycle

A Frenchman, M. de Sivray, is said to have originated the idea for a bicycle. His first machine appeared in Paris during 1690. It consisted of a wooden frame and two wheels. Locomotion was achieved by pushing on the ground with the feet.

Worms feed upon the vitality of children and endanger their lives. A simple and effective remedy is Mother's Grain Worm Exterminator.

Saskatoon now has 135,571 farms and Alberta 97,928.

### Low Ocean Fares

Britain Preparing For Greater Invasion Of Tourists From Canada Than Ever Before

Britain is preparing for a greater invasion of tourists from Canada and the United States than ever before, this season. This is due to more determined efforts on the part of the Travel Association of Great Britain and Ireland, who have highly organized their resources for welcoming visitors to the Old Land.

Recent ocean rate reductions to the extent of 20 per cent have now made it possible to spend a summer holiday by going to Europe, during whatever sight-seeing one's time permits, and returning to this country for an all-inclusive charge of less than seven dollars a day, according to the Cunard and Anchor-Donaldson lines. These tours in Europe include the best sight-seeing in the time available, chiefly by motor coach, as well as by rail and steamer. These tours also include visits to the Continent, in France and Belgium especially.

"Modern Third Class" is used for the ocean crossing and to many people whose memories of Third Class date back to many years ago when they first came to Canada, this class offers surprising comfort. Nowadays, in fact, third class is more comfortable than first class was thirty or forty years ago.

Ontario and Quebec provinces expect to reap some benefit from the mass of tourists who pass through Montreal on their way to Europe, as many western Canada and United States visitors spend some time seeing Ottawa, Toronto and Montreal en route.

Like a Grip At The Throat. For a disease that is not classed as fatal there is probably none which causes more terrible suffering than asthma. Sleep is impossible, the sufferer becomes exhausted and finally, though the attack passes, is left in unceasing pain and distress. Dr. J. D. Kellogg's Asthma Remedy is a wonderful remedial agent. It immediately relieves the restricted air passage as thousands can testify. It is sold by dealers everywhere.

Large shipments of construction materials continue to arrive in Manchuria.

Eggs laid in spring keep better in water glass than do eggs laid in summer or fall.

### Soap Used Without Water

A waterless soap has been developed by a chemist attached to a joint concern in Kansas City. The soap, in the form of a paste, is said to be harmless to the skin and even possesses healing and antiseptic qualities. It lathers freely without water and absorbs all dirt.

Persian Balm—the peerless aid to loveliness. Delightfully fragrant. Dainty to use. Leaves no stickiness. A little gentle rubbing and it is swiftly absorbed by the tissues. Tonic in effect. Soothes and dispels roughness and chafing. Keeps skins soft and velvet-textured. Unrivalled for charm, distinction and refinement. Used by lovely women everywhere to preserve and enhance their natural beauty.

Cannels in the small province of Grenada, Africa, now number 40,000.

## Report Submitted On The Milling And Baking Qualities Of Spring Wheat Varieties

A report on the milling and baking qualities of Canadian spring wheat varieties has been submitted to the committee on agriculture.

The report was made to the National Research Council by J. G. Molish, assistant research biologist, University of Alberta; W. F. Gledhill, professor of agricultural chemistry, University of Manitoba; and E. J. Lamm, assistant professor of chemistry, University of Saskatchewan.

A co-operative study was made of the milling and baking quality of 29 varieties of spring wheat, now grown in western Canada. Samples were grown in adjacent plots by the Dominion Experimental Farms and Universities in Manitoba, Saskatchewan and Alberta in 1928, 1929 and 1930. Only samples which were sound enough to be placed in the statutory grades by official inspectors were used.

Part of each sample was milled and baked in each of the three co-operating laboratories. Four baking formulas were used. The varieties were classified on the basis of loaf volume, texture, crumb color, general appearance of loaf, absorption and yield of straight flour. These classifications were combined to give classifications for baking quality and milling quality and finally for suitability for export and domestic milling. The last classification is hereby:

1. Varieties which are entirely satisfactory: Reward, Crest, Marquis, Pioneer, Red Pile, Renfrew, Red Bobs 222 and Supreme.

2. Varieties which are fairly satisfactory: Early Red Pile, Ruby and Early Triumph.

3. Varieties which are unsatisfactory: (a) Wheat which are Quality Assiniboine and Herd Federation. (b) Varieties differing from Marquis in milling characteristics: Garnet and Kola. (c) Varieties inferior to Marquis in baking characteristics: Garnet, Parker's Selection, Pioneer, head, Huron, Kitchener, Preston and Marquillo.

4. Varieties which are very unsatisfactory: Early Prolific, Dacklow and Vermillion.

Of Marquis, the report states it is "our standard variety and is satisfactory in all respects."

Dealing with Reward, the report reads:

"Reward has a high weight per bushel and a satisfactory flour yield. It has a very high protein content. The baking qualities are excellent. It gives loaves of large volume with good color, texture, appearance and absorption. Reward is the best milling and baking quality of the varieties tested."

Among the varieties placed in the class unsatisfactory for export or domestic milling in the report, perhaps the most extensively grown is Garnet. The report states:

"Garnet: The test weight and the yield of flour are satisfactory. Garnet differs from Marquis in its tempering properties and cannot be tempered properly when mixed with that variety. For this reason the milling quality of Garnet is classed as fair. The protein content is low. It is satisfactory in absorption and in appearance of the loaves. The other baking characteristics are poor."

"It gives small loaves, with poor texture, particularly when baked by the blend-biscuits or malt-phosphate formulas. The color of the crumb is decidedly yellow. Garnet cannot be considered a desirable variety."

The report was dated on April 4.

"What a silly place to put a wash-basin!" Bondagunne-Brix, Stockholm.

### Not Easy To Answer

**How Can Farmer Make Money With Prices So Low**

We can tell the farmer to a decimal point how many acres of soil or stubble a man should plow in a ten-hour day with a team of horses or with a tractor. We can inform him that he should be able to grow potatoes for 30 cents per bushel; likewise that the average length of life of a cornsharer is 2.6 years, and that a gang-plow should live to the fine old age of 19.3 years. Yes, sir, we can fairly spout statistics and figures which would amaze the man on the farm. But honestly, brother, when you ask how to make money selling milk to the factory at something under two cents per quart, and when you learn for enlightenment on how to wax fat on selling pigs with their boots on at \$1.25 per hundred, we must follow our usual policy of being very frank, and our answer is that we have a sneaking suspicion that you can't do it. —Straitford Beacon-Herald.

### Work Under Handicap

**Watch Is Not Used By Russian Railway Men**

The lack of watches in Soviet pockets is partially blamed by the Transport Union for recent railway disasters, says a message from Moscow. Workers' trainmen are late, and the transportation system suffers from lack of co-ordination when employees cannot determine whether they are operating their trains according to the time-table. The Commissariat of Transport, tried the experiment of issuing watches to men as they went on duty, and having them turned in at the close of work, so they would be available for the next shift. This proved unsatisfactory, chiefly because the watches were not given sufficient care. Now the Union has called on the Commissariat of Supply to speed up the output of watches so that all railway men may have them.

### Navigators Fear Fog

**Only Danger Which Is Really Alarming To Sea Captain**

Fogs are the most dangerous hazards that confront navigators. A sea captain is not greatly alarmed by a heavy gale; he doesn't worry much about a high running sea; he manoeuvres his vessel through treacherous sounds and within perilsous passages without more than ordinary caution; but when a thick fog hangs over the water he immediately reduces the speed of his ship and keeps his ears open for the bellow of the foghorn that indicates the proximity of a dangerous shore or a hidden rock.

The U.S. army and navy have 12 standard sizes of fogs.

### Plants Think On Seeing the Light

**Scientist Says Vegetable Kingdom Has Brains and Uses Them**

When you see a plant bending toward the light, it is thinking. For plants have brains according to experiments conducted by the Smithsonian Institution at Washington. Like human beings and animals, they also have eyes and legs and use them.

This relation between the vegetable and animal kingdom, discovery of which may have far-reaching results, was disclosed by a doctor who has made a study of the actions of plants when exposed to light.

"There appears to exist in the plant a more or less localized region capable of receiving a stimulus," he said. "It has been shown that the most sensitive portion of a coleoptile, the leaf sheath surrounding the bud of an ascending shoot—is the first fifty microns of the tip. The first millimeter is 100 times as sensitive as the second, and 1,800 times as sensitive as the third millimeter zone."

The tip of the plant corresponds to an eye. When light strikes the "eye," then the stem of the plant corresponding to the leg, bends much as a human being does in walking.

### A Really New Invention

**Quebec Man Has Potato Machine That Works Subliminally**

The completion of a potato digging machine of his own invention has recently been announced by Joseph Monu, of Ville St. Pierre near Montreal. He claims that it has been inspected by the federal and provincial government authorities and pronounced to be the only machine in existence today that will dig potatoes without injuring the vegetable. It weighs 300 lbs., is made up of twenty component parts and can be hauled by a team of horses or by a motor truck.

### Cling To Old Idea

**North Carolina Indians Still Believe In "Witch Children"**

"Witch children," specially educated from babies to be witches, have just been reported by a scientist to exist among the Cherokee Indians of North Carolina.

These 20th century witches are "made, not born," says Dr. Francis M. Olinette, Belgian ethnologist, in a report issued by the Smithsonian Institution. Children, preferably twins, selected for a career as witches are put through an initiation supposed to endow them with supernatural powers.

### Oldest Official Retiring

Sir Edward Wallington, a member of the Queen's household, first as private secretary and then as treasurer since the accession of King George, is soon to retire from office. He is the oldest official in the royal household and was born in 1854. At one time he was private secretary to a succession of colonial governors, and came to be known as "Walter Scott" Wallington, due to his skill in heading off undesired visitors.

## Probable Carry-Over Of Wheat Is Expected To Be Smallest Since 1928, According To Estimates

### Northern Grown Seed

**Herman Treile Advises U.S. To Avoid Danger From Rust**

Prairie farmers who face the annual menace of rust should fight by use of northern grown seed grain, declared Herman Treile, wheat king, at Edmonton.

Reports on Peace River seed used on the southern prairie affected zones had shown practical immunity the first year, while resistance began to break down the second year. That indicates change of seed every third year would prove good insurance against rust. He believed seed grown in northern Saskatchewan would be equally as effective for Manitoba and southern prairie farmers.

Treile doubled the research hunt for good milling resistance wheat varieties as a "wild goose chase" and waste of time and money.

### Watermark On Paper

**Pulp Is Passed Under Roller Which Bears Requisite Device**

A watermark is a device which is incorporated in the body of a paper. When paper is made by machinery the paper pulp is passed under a wire roller, known as the "dandy" roll, which bears the requisite watermark device. The paper is thus thinned where the wires of the "dandy" roll touch it, and so, when the paper is finished, these parts are more transparent than the rest. While a large number of postage stamps are printed on watermark paper, it is incorrect to suppose that a specimen is not genuine because its paper is unmarked. There are many countries which do not avail themselves of this useful safeguard against the forgery of their postage stamps.

### Undue Pessimism

**Canada Suffering From A National Headache, Says Hon. R. J. Manion**

"We are suffering from a national headache induced by a financial debacle," said Hon. R. J. Manion, Federal Minister of Railways and Canada, in the course of an address before the Toronto Liberal-Conservative Businessmen's Club at Toronto.

"There is undue pessimism just as there was undue optimism in the boom days of 1929," he said. "Let us practice some of the spirit showing during the war, and we will be one of the first countries to return to prosperity."

### Laps Issue Warning

A warning to the League of Nations and to Soviet Russia to keep "hands off Manchuria" was issued by General Shun Araki, Japanese war minister, in a speech to the Kokushikan, a patriotic society of Osaka.

A survey of the world wheat situation shows varying conditions, but the bright spot for Canada is the estimate, with indications of favorable export trade for the balance of the present crop year, ending July 31, 1932.

Recent estimates place the probable carry-over at 104,000,000 bushels, the smallest since 1928 and about 20,000,000 bushels less than on July 31, 1931.

In a review of world conditions, issued by the Dominion Bureau of Statistics, the European market is described as "broader today than at any time during the present crop year." World import requirements for the balance of the crop year are placed at from 225,000,000 to 235,000,000 bushels. Under present conditions, Canada and the United States will be called on to supply 150,000,000 bushels, probably says the bureau review, about 75,000,000 from each country.

Reports of below normal conditions in the winter wheat belt of the United States have focused the eyes of the grain trade on the situation there. With early reports of a crop 42 per cent below the 1931 yield, weather conditions over that production area in the next few weeks will have an important effect upon the world situation.

Growing crops in Europe are subject of varying reports, but it is too early, adds the review, to offer definite comments. In general, crops in northern Europe are inclined to be backward, and in central Europe, including France, Spain and Germany, are in good condition. The Danubian countries report favorable development, with the exception of Hungary, where wheat and rye crops are unsatisfactory. Reports from Russia continue to indicate difficulty in getting the 1932 production underway and the Soviet continues to offer a field for speculation among students of the wheat situation.

### Dentists Require More Than Mechanical Skill

**Students Now Get Good Grounding In Medical Science**

No profession offers better possibilities in the province of Quebec than the dental profession, Dr. Walsh, acting dean of the Dental Faculty of McGill University, told members of the Qyco Club at Montreal. There was only one dentist for every 3,300 persons he pointed out.

Up to the present time, Dr. Walsh thought, the dental profession had been looked upon as merely a highly-skilled mechanical one. All this was changing, however, and it was generally recognized now that students of dentistry were getting every bit as good as the medical students. He prophesied that the time was close at hand when people would not merely ask the dentist what was wrong with this or that tooth, but ply him with the question: "Is anything wrong with my mouth?"

### One Much To Grieve

It is forty years since Sir Wilfrid Grenfell went to the Labrador and set about helping the distressed natives. Now, thanks to him, the coast has five hospitals, seven nursing stations, two schools, co-operative stores, orphanages, trading centres, and children's homes.

"I came here because I am a bachelor and love you."

"I came here because I am married and love peace." Buen Humor, Madrid.

## Inglorious End of Glorious Flight

Workmen are shown hauling the wreckage of the plane in which J. A. Mollison (inset), English aviator, made a record-breaking flight from England to Africa, from the Milnerton Beach, Cape Town, South Africa. The aviator crashed on the completion of his long flight while attempting to make a landing on the beach. He flew from London, England, to the tip of Africa in just five days. Mollison was uninjured in the crash and immediately drove to the beach area, where thousands of anxious spectators greeted him.

## Didsbury Bakery

Specials for May 21, 23

Jelly Rolls, 2 for  
**25c**

## Fur Farming At Didsbury

Fur farming has been in successful operation at Didsbury for the past few years, and from a very small beginning has now reached a real commercial basis.

Mr. E. Boettger started in 1928 with one pair of foxes and after operating 4 years has now 18 foxes for breeding purposes. His present stock has been raised from the original pair, and in addition he has sold 8 for breeding purposes and has pelted 16.

This season he is meeting with good success and has at present 6 litters of pups and is expecting more later.

Mr. Boettger says that though the price of fur at present is not the best, he thinks that fur farming is on a solid basis, profitable even at present prices. He sells furs through the Canadian Silver Fox Breeders' Assn., and has marketed furs in both London and Paris markets.

Mrs. Harmer, formerly of the Rebel Hotel, is operating a few ranch east of town, with Dr. McEwan as manager. This ranch was started in 1927 with one pair and has now 20 pairs of breeders. So far, 13 pairs have had litters and have 40 pups, more being expected at an early date. This is a considerable increase over last year, when 8 pups only were raised. So far, only a few have been sold from the Harmer ranch, they are mostly retained for breeding purposes.

Dr. McEwan introduced a somewhat novel procedure this spring. Two of the vixen were unable to raise pups, so he introduced two cats to the pups and they are raising their strange family successfully.

The raising of mink for fur has not been overlooked and two mink farms have been established in the district.

Dr. Clarke started his mink farm a little over a year ago and has met with good success with the little animals. Last year he raised several litters which averaged six to a litter.

Mr. Alex McNaughten made a start in the mink game this year on his farm west of town and imported fourteen mink for his foundation stock.

Both farms are stocked with Quebec mink, which are celebrated for their richness of fur. At present the mink are raising their young and cannot be molested, so the number of pups raised this year cannot yet be ascertained.

## Forest Destruction In Alberta Serious

Considered from the standpoint of destruction of forest resources, the fire season of 1931, reports the Alberta Department of Lands and Mines, was probably the most disastrous on record. Weather conditions prevailing during the winter of 1930-31 were such that fires started readily and burnt into the ground, thus providing a start for destructive fires in the spring. On the forests of the east slope of the Rocky Mountains it was necessary to fight fires on several occasions during the winter.

As a result of winter conditions and of the weather and ground conditions in the spring whereby fire spread rapidly, fires set for the purpose of clearing land and fires from other causes, assumed dangerous proportions and resulted in an enormous loss of forest resources and of private property. In addition the productivity of the soil and greatly damaged.

An examination of fire causes, state officials in charge of forest preservation, leaves no doubt as to the responsibility of individuals and indicates that little or no thought was given to the results. In many instances the danger to life and to the destruction of public and private property was entirely overlooked. Improvements on neighboring lands were destroyed with no thought of the importance of individual welfare in the success of the community. In order to clear comparatively small areas, fires were indiscriminately set which destroyed large areas of important forest cover, which areas in a great many instances would at a later date contribute in no small way to the welfare of the individual and the community.

Settlers' fires dealt with by the forest reserve numbered 136, being 21.86 per cent. of the total fires dealt with.

The statement of the department concludes:

"Campers, which includes all forest travellers, contributed to the destruction in no small way. Carelessness, laziness and ignorance no doubt explain why 147 fires are known to have originated with campers. It is difficult to understand why people who go to the forest for recreation or who obtain their livelihood from the forest, should be guilty of such carelessness. In the province of Alberta are found conditions more favorable to outdoor recreation than in many countries. There is an abundance of game birds, fish and big game. These, however, cannot exist if forest destruction continues at the rate of 1931."

## Notice of Sale

Notice is hereby given under section 48 of the Domestic Animals Act (Municipalities) that the following horses were impounded in the pound kept by W. V. J. Scheidt located on the N.W. 16-31-4-5, on the 16th day of April, 1932 and sold on May 2nd, 1932.

One bay gelding colt, one year old, no visible brands, sold to Chas. Deadrick, Didsbury, Alta.

One black mare, about 7 years old, branded VB on left shoulder sold to Chas. Deadrick, Didsbury, Alta.

One bay gelding, about 6 years old, VB branded on left shoulder, brand indistinct, sold to John Hegner, Didsbury, Alta.

One bay mare about 6 years old, branded VB on left shoulder, brand indistinct, sold to John Kreshow, Didsbury and that the said animals may be redeemed by the owner, or on his behalf within a period of thirty days from the publication of this notice in the Alberta Gazette, upon the payment of all fees and costs due the municipality and the purchaser of said animals.

A. BRUSSO,

Sec.-Treas. Municipal District of Mountain View, No. 310.

## GRAIN SHIPMENTS REPORTED FOR RUSSIAN POINTS

Vancouver, B.C.—The Vancouver Sun publishes the following: "Coming as the most significant development in the Vancouver grain market, confirmation was secured of the sale of 1,200,000 bushels of grain for shipment to Russia from this port. "Five vessels have been chartered to carry it to Vladivostok. The 'Castlemoon' now loading here, is one. Names of the other four have not been disclosed. "With Russia, three months ago regarded as the greatest menace to other wheat exporting countries, now back to world markets as a buyer, Vancouver grain men believed possibly 100,000,000 bushels of wheat would move through Vancouver to Siberia in the next few months. "The 40,000 tons of grain going out on these five ships to a consuming channel undreamed of six weeks ago are generally understood to be supplies for Russian troops advanced in Siberia since the Manchurian border trouble with Japan. "Not a great deal is known about the shipments since most of the wheat was negotiated in London. "The London office of Kerr, Milford and Company arranged four of the cargoes. It is understood. "Two of the ships to carry the wheat were fixed in London, and the other three are stated to have been secured through the Canadian Transport Company of Vancouver. "While the requirement of the Russian military forces in Siberia are considered the chief cause of the Canadian orders, the underlying reason for the shipments is believed to be new famine conditions in the Volga section of Russia.

## Defendants Are Freed

One Hour Sentence Is Imposed In Connection With Massie Conviction

Honolulu.—Governor Lawrence M. Judd freed the four defendants of the famous Massie murder trial one hour after they had been sentenced to 10 years at hard labor at Oahu prison. "Sentence was passed in a surprise move on Lieut. Thomas H. Massie, his mother-in-law, Mrs. Granville Fortescue, and the two women, E. J. Lord and Albert O. Jones.

Their hour of confinement was spent in the nominal custody of the sheriff at Iolani Palace, across the street from the judiciary building where, for several weeks, they battled unsuccessfully for freedom on charges of slaying Joseph Kihalekai, asserted attacker of Mrs. Massie.

Governor Judd, in commuting the sentence to one hour, merely said he was acting in petition of the four defendants in which their counsel joined and was commuting the sentence to one hour.

## Editor Arrested

Finch Newspaper Man Of Sudbury Whisked Away Under Police Guard

Sudbury, Ont.—Arvo Vuora, editor of the Finnish daily "Vapaus" and Martin Parker, translator, arrested in a Royal Canadian Mounted Police raid on the newspaper's offices, were loaded into an automobile and rushed out of town in a southerly direction. Five plain clothes detectives guarded them.

Mounted police refused to divulge the destination of the car bearing their prisoners and declined to discuss the case.

Had Money In Bank. Hamilton, Ont.—Barted as a pauper recently, Osoinsh Markie had \$14,000 in the bank. Markie died in a rooming house, and his family recently found a bank book bearing a record of deposits. Investigation proved the money was actually there.

## Bacon Export Higher

Ottawa, Ont.—During the first three months of the present year the total exportation of bacon and hams to Great Britain was 5,618,000 pounds as compared with 5,357,100 in the corresponding period of 1931.

W. N. C. 1932

## Curtail Waste Of Gas

Steps Are Taken To Cut Down Gas Production In Turner Valley

Calgary, Alberta.—Turner Valley gas conservation board, formed by the government to curtail the waste of gas in Turner Valley gas field, announced that orders would be issued immediately requiring oil companies to cut down gas production. The board aims to lower production to 200,000,000 cubic feet daily in an effort to prolong the life of the gas fields.

It is understood oil companies will be informed that they have 48 hours to reduce their gas yield to conform with the board's objective. It is expected gas production will be curtailed greatly and most of the waste gas flares at the Turner Valley Wells practically extinguished.

The board members have elected A. A. Carpenter, chairman. Other members of the board are John McLeish of the Department of Mines, Ottawa, and Dr. B. C. Wallace, president of the University of Alberta.

## Adventurous Cruise

Small Vessel To Sail For Southern Seas In Search Of Treasure

Toronto, Ont.—Bound south, the 65-foot auxiliary schooner "Swander" will dip her flag in farewell to Lanching, N.S., in a few weeks on an adventurous cruise. Skipped by Lieut.-Commander Geoffrey Cogh, of Toronto, the little vessel will follow a long itinerary. The only woman in the crew is Mrs. Cogh, while Frank Everett, her brother, and Murdoch Kirby are the other principals in what is hoped to be a search for treasure. The party is to search for treasure in Geos Island and Collet's data on the Hawaiian. The extensive race said to inhabit Easter Island. Everywhere they visit, photographs are to be taken, and when the ultimate destination, Singapore, is reached, the party hopes to have one of the most valuable photographic collections of South Sea information in existence.

## Assistance Will Be Given

Donation To Stand Behind Provinces In Relief Matters

Ottawa, Ont.—The Dominion will contribute and where necessary loan aid to the provinces in the matter of direct relief, a percentage of relief cost, yet to be determined will be paid to the provinces; and if a province is unable at the moment to pay its share, the Dominion exchequer will loan this amount taking in security treasury bills.

This position of the Dominion Government was made clear in the House of Commons by Hon. W. A. Gordon, Minister of Labor, during consideration of the unemployment relief resolution. The minister was answering a request for the attitude of the Administration from Mr. Hon. Mackenzie King, opposition leader, and Hon. Ernest Lapointe (Lib., Quebec East).

## Indians Getting Franchise

Many Being Recognized As Entitled To Full Citizenship

Ottawa, Ont.—The enfranchisement of Indians is proceeding with individuals receiving full citizenship by order-in-council as circumstances warrant. Hon. T. G. Murphy, superintendent-general of Indian Affairs, told Dr. Peter McGibbon (Cons., Manitoba), in the House of Commons, Dr. McGibbon said in his constituency were two bands of Indians, to whom intelligence and industry he paid high tribute. They wanted full citizenship, and Dr. McGibbon felt they ought to have it.

## Will Not Modify Bill

Dublin, Irish Free State.—The Republican Government of the Irish Free State effectively put down two opposition amendments which would have modified its bill to abolish the oath of allegiance to the British crown as a requisite to tenure of public office.

## Death Toll Heavy

Java, Philippine Islands.—Related reports brought the number of persons killed on the island of Bali by the recent typhoon to at least 65. It is feared that many others are dead. The authorities estimated that 25,000 were rendered homeless.

## BREAKS RECORD

G. W. A. Scott, British flier, who has just set a new record for the flight from England to Australia. Scott's time for the 10,187 miles was eight days, thirteen hours and 53 minutes.

## Protests Against Use Of American Ports

Maritime Senator Thinks Route For Canadian Grain Should Be Changed

Toronto, Ont.—Senator W. H. Denison, of Halifax, told an interviewer it was "difficult for the people of the Maritimes to find justification for shipment of millions of bushels of Canadian grain through United States Atlantic ports."

He said United States railwaymen and waterfront workers were being provided employment handling Canadian grain while "the great Atlantic ports of Halifax and Saint John were idle as regards Canadian grain traffic."

## Churchill Insurance Rates

Effort To Be Made To Secure Lower Rates On Grain Shipments

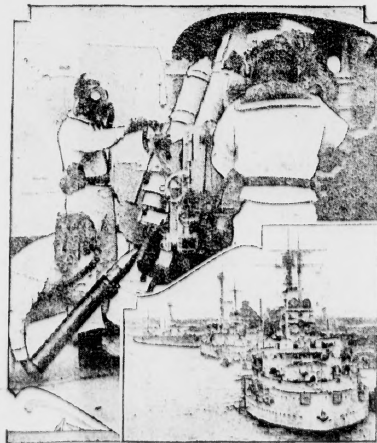

Ottawa, Ont.—Every effort is being made to secure insurance rates that will encourage grain shippers to use the new terminal facilities at Churchill on Hudson Bay. Hon. C. H. Cahan, secretary of state, advised the House in answer to questions.

The Imperial shipping board in England secured a reduction in the rate in 1931. Mr. Cahan said, and there were hopes of further reductions in the near future.

## Will Use Regular Service

London, England.—The British delegation to the Imperial Conference at Ottawa will travel by the normal passenger service across the Atlantic and not in a vessel of the royal navy. This was the reply in the House of Commons to a query by Thomas Griffiths, Labor member.

## Germany's Rebuilt Navy

Here are two of the first pictures to be made of the new German navy built to replace the Imperial Navy which was scuttled at Scapa Flow, Scotland, after surrender to the British. Banners of the cruiser Koenigsberg are shown at anti-aircraft gunnery practice, during recent manoeuvres in the Baltic Sea. Note that the men are equipped with the latest type gas masks. Inset shows some of the ships of the fleet in line.

## Prepare For Conference

Alberta Arranging For Suggestions To Present To Imperial Parley

Edmonton, Alberta.—First steps toward preparing an Alberta statement for submission to the Imperial Conference in Ottawa next July are now being taken. It was announced by Premier Brownlee. As a preliminary step letters are being sent to organizations representing the economic interests in the province, in which they are invited to forward any suggestions they may have to offer.

It is expected that the Dominion Government will extend an invitation to the provinces to submit suggestions as to the position to be taken by Canadian interests at the conference.

The Alberta Government will also participate in a joint conference to which the Saskatchewan Government has invited its two neighboring provinces and which will be held about June 8. An exchange of views in preparation for the Ottawa conference will be the purpose of this preliminary meeting, but Mr. Brownlee points out that it may not be found desirable to make a joint representation, inasmuch as the interests and resource of this province are much more varied than those of the other two provinces.

## Dawson Ice Breaks Early

Woman Was Winner Of Annual Prize For Guessing Date

Dawson, Y.T.—The ice in Yukon River melted out in front of Dawson on May 1 at 7:32 p.m., Y.T., thus deciding Dawson's annual ice sweepstake in which guesses this year were confined solely to Dawson City and the immediate vicinity.

Total pool was \$1,200, given as one prize and won by Mrs. Negin of Gold Bottom Creek, with a guess of May 2, 7:37 p.m.

This is one of the earliest break-ups of the ice at Dawson in the memory of the white men.

## Naval Appointments

Ottawa, Ont.—The appointment of Commander V. C. Brodeur as commander-in-charge at Esquimalt, B.C., effective from May 27, was announced by the Department of National Defence. It was also announced that Commander G. C. Jones would take command of H.M.C.S. Skeena, and the western division on May 25.

## U.S. Taxes All Cheques

Washington, D.C.—A flat rate of four cents on the sale of each \$100 bond was voted by the United States senate finance committee. The rate was the same as set for stock sales. The committee made all cheques subject to the two cents tax, eliminating the 85 exemption allowed in its original proposal.

## BILL IS DRAFTED TO DEAL WITH UNEMPLOYMENT

Ottawa, Ont.—The House of Commons took the first step to clasp the government with wide powers to combat unemployment. A bill was given first reading which would confer almost blanket power on the ministry until the end of the fiscal year next March. Debate on the resolution which prefaced the introduction of the bill was desultory.

Under the terms of the bill, which may meet more concerted opposition in its later stages, the government would possess power to negotiate agreements with the provinces, grant financial assistance to them and take steps "to protect the credit and financial position of the Dominion or any province." Money might be loaned to public or private undertakings. One clause of the bill would enable the government to "assist in defraying the cost of the sale and distribution of the products of the field, farm, forest, sea, river and mines," and this has given rise to speculation concerning a bounty system on the products of some primary industries. The bill contained no limit on the money that might be expended by the Dominion.

The back-to-the-land movement, if encouraged by the government, should not be confined to crown lands, said W. W. Kennedy, (Cons., Winnipeg, South Centre). He knew of many good farms which had been returned to the municipalities for various reasons, and it was to these farms already partially cultivated and equipped that the movement should be directed.

Hon. W. R. Motherwell (Lib., Montreal), said Saskatchewan had for many years, before the three successive crop failures in certain parts, produced more wheat than all the rest of the Dominion together. In connection with the five-cent bonus on wheat a request had been made to the government, he said, for an acreage bonus of \$1 per acre of seeded acreage. Later on, Mr. Motherwell suggested, the government might announce its attitude towards the request for an acreage bonus.

## Amazing Spirit Manifested

No Evidence Of Complaining On Part Of Business Men And Farmers

Vancouver, B.C.—Impressed with the unending spirit of optimism and hope on the Canadian prairies, Hon. H. H. Stevens, Minister of Trade and Commerce, reached Vancouver for convocation of the University of British Columbia.

There is no evidence of whining or complaining on the part of business men and farmers in the prairie provinces," he said. "Crop prospects are good and when harvest comes there should be a wide demand for labor. It is noticeable that there is a return to the old horse power in replacing machine power on the land."

## Passed Both Houses

Royal Assent Is Given To Number Of Bills

Ottawa, Ont.—Chief Justice Anglin, as Deputy to the Governor-General gave royal assent in the senate to a number of bills which had passed both houses. These bills include the following: To amend the patent act; to amend the petroleum and naphtha inspection act; respecting debts due to the crown; to amend the opium and narcotic drugs act, 1929; to amend the Yukon quartz mining act; respecting the Canadian Pacific Railway Company; to amend the destructive insect and pest act; to incorporate Lake of the Woods International Bridge Company.

## Receives Flower Seeds

Toronto, Ont.—Flowers will bloom again in drought-stricken western Canada. A letter received by W. L. Aiken, Toronto originator of the idea of despatching flower seeds to western Canadian exiles, expressed gratitude for the thoughtfulness of Ontario people. The letter was signed by C. B. Daniel, general manager of the Saskatchewan Relief Commission.

## Wheat Growing From A Miller's Standpoint.

Roschud Flour Mills were first built and named Maple Leaf Flour Mills in the year 1907 at a cost of \$35,000. After two years operation they were destroyed by fire, the loss of which was heavy. Rebuilding started in 1910 and the structure finished in 1911 at a cost in excess of the first set of figures.

During the first years of the life of the industry the wheat raised was principally a soft, white winter wheat and Alberta Red, a hard wheat. The seasons changed, however, and it was found difficult to keep to winter wheat growing, due to spring killing and other seasons not known. Since then many varieties have been experimented with in the hope of finding a suitable wheat for districts such as these where soil conditions show deficiency in mineral elements and are high in nitrates. The high nitrate was, and is yet, a factor to be dealt with.

The varieties of wheat which have proven most satisfactory from a miller's standpoint are Marquis, Red Life and Reward. Red Life was found to be too late for this district; Marquis in wet years, likewise, has proven too irregular from a miller's standpoint; Reward, of the Marquis family (and is equally good for milling) is now giving promise of a suitable wheat for the district. True, the first output of Reward was given "smut," but the later samples have improved according to Dr. Terry, of our research council, and to statements made by Mr. Trella, Alberta's wheat inspector. From the grower's standpoint, Grant has given general satisfaction, but many prefer to use Marquis wheat flour, since the color and other minor defects are evident in flour made from Grant. It is only fair, however, to say that the flavor and nourishment are in favor of Grant, and since we have gone "color crazy" in many parts of the world and make that a leading criterion in the judgment of flour, we will naturally have to pay for color if we want it.

Since Canadian wheat has made a world-wide reputation for itself, it is therefore policy to grow wheat that will sustain the quality reputation. Here then, arises the local question, how can we in our district overcome the late maturing of suitable varieties of wheat such as the Marquis family? (Red Bobs, 222, Reward and Marquis). There are several factors which seem to lend themselves in accomplishing the hastening of the crop, namely: early sowing on well-prepared soil, slight increase of seed, well graded and cleaned, soil packed either by press-drill or packer, and with the above, ammonia, super-phosphate or anything of a mineral nature to supplement the serious lack of our soil. It has been proven by analysis and practical baking tests that wheat from districts where mineral elements are prevalent, blended with wheat grown on a soil of a heavy nitrate nature, makes a better loaf of bread than either one baked separately. Therefore, it can be readily seen that there are reasons why we should work along suggested lines. Not only does mineral improve the flour, but also feed for stock. The district is subject to goitre, especially in wet seasons when there is a heavy growth.

The various experiments tried during our milling experience have led us to state the above facts, and the Management of the Roschud Flour Mills invites the co-operation of everyone connected with the situation, from the growing of grain to the cooking and eating of foods. Milling is no longer regarded as a

technicality, but as an important factor between producer and consumer from a scientific standpoint.

Much might be said regarding the economic possibilities, etc., suffice to say that the actual direct and indirect savings have more than offset the cost of same.

There is still much to be exploited and if the co-operation is extended there is no reason why many of the present problems cannot be worked out to our mutual advantage, the "pros, and cons," being at our command.

M. WEBER,  
Didsbury.

## New Plan Checks Nosefly in Sheep

One enterprising farmer in southern Saskatchewan has reported a new plan to check the troublesome nosefly which bothers sheep in summer. The old plan was to dash tar liberally on the nose of the animal.

Under the new idea the farmer obtains some discarded railroad ties and bores several holes three inches in diameter about a foot apart. The holes are then filled with salt, and tar is daubed liberally around and on the inside of the holes.

The sheep reaching their tongues into the holes to obtain salt, amoint their own noses with the tar, thus saving the herdsman much trouble and also checking the ravages of the nosefly.

# Says Garnet Wheat Should Be Graded Separately In Order To Command A Better Price

If Garnet wheat were graded separately, thus allowing millers to make their own blends, it would have a better chance of commanding a premium in the market than it has at present. This variety is at the moment graded as No. 2 Northern.

Such was the opinion of E. B. Ramsay, chief of the board of grain commissioners, expressed to the House of Commons Committee on Agriculture.

Last October the western grain standards board passed a resolution recommending that separate grades be erected for Garnet. Parliament, however, requested that this action be deferred for the present year, but that the grades will not be disturbed for another 12 months at least.

The chief antagonism against Garnet came from the Canadian millers. Mr. Ramsay told the committee. Their prejudice was due to the yellowish tinge of the flour and not to any inferiority in qualities. Foreign millers had found it satisfactory. Also, Canadian millers did not wish to buy a No. 2 Northern, in which grade Garnet had been put. Asked by W. R. Motherwell (Liberal, Melville), if the real reason for this antagonism might not be that the Canadian millers did not want to incur the expense that might be entailed in adjusting their machinery to grind Garnet, Mr. Ramsay believed this to be a factor.

Of 276,000,000 bushels of wheat produced last year Garnet totalled 45,000,000, thus indicating the popularity of this variety in the west. Mr. Ramsay urged that blending Garnet with other varieties should be scientific and not haphazard. The high quality of Canadian wheat must be maintained, for the Canadian inspection certificate was the only one accepted in England at its face value.

He thought that if foreign importers wanted Garnet, they should know they were getting that variety. At present, they did not know what they were getting inasmuch as shipments were made only on the basis of No. 2 Northern. These might contain 10 per cent. Garnet, or 80 per cent.

## New Gold Mines

Rich Areas Are Reported In Northern Manitoba.

New gold mines will be discovered and developed in Manitoba, predicted J. F. Wright, of the Geological Survey, in a paper delivered before the annual convention of the Canadian Institute of Mining and Metallurgy in session in Montreal.

Dr. Wright, who has devoted a great deal of his time in recent years to examination of mineral areas in Manitoba, referred particularly to the areas about Island Gods and Oxford Lakes as new ground offering interesting possibilities to the prospector. These areas, formerly inaccessible, can now be reached by airplane, he stated, and have already yielded some promising prospects which he described in some detail.

Practical suggestions and instruction to the prospector were contained in Dr. Wright's paper calculated to direct his efforts into the most productive channels.

Present evidence, concluded Dr. Wright, points towards interesting possibilities in the neighborhood of the three lakes mentioned. They are located about 150 miles east of the northern end of Lake Winnipeg.

"Can you lend me five marks quickly?"  
"No, nor slowly either." Jugend.  
Munch.

W. N. U. 1838

## The Wheat Bonus

Over \$11,000,000 Distributed At a Cost Of \$107,000

The cost of administering the wheat bonus of five cents a bushel last year was \$107,000. H. H. Stevens, Minister of Trade and Commerce, told the House of Commons. In committee of supply the House was considering an estimate of \$2,400,000 for the Canada Grain Act. The appropriation represented a reduction of \$331,000 from the sum voted last year.

More than 2,000,000 cheques had to be mailed out to the farmers receiving the bounty, he said. The bonus itself was more than \$11,000,000 last year.

The bonus was administered by the Board of Grain Commissioners, and the \$107,000 taken up with administration costs, represented one per cent of the moneys applied.

WHEN ONE'S BUDGET IS LIMITED IT PLAYS A DOUBLE ROLE!

You can wear this fascinatingly lovely dress for Sunday nights or afternoons.

It has its own little jacket! See the miniature figure!

The jacket has a peplum hip full and exceedingly attractive sleeves. It's youthfully smart in black crepe silk. The deep bodice yoke that terminates in the fashionable capelet back, is of lace.

And isn't the skirt tricky with its crossed diagonal through the hips? Style No. 718 is designed in sizes 14, 16, 18, 20 years, 36, 38 and 40 inches bust. Size 16 requires 2 1/2 yards of 39-inch material with 8 1/2 yard of 35-inch all-over lace. The separate jacket takes 2 1/2 yards of 39-inch material.

Printed crepe silk with the bodice of plain toning crepe is chic. Price of pattern 25 cents in stamps or coin (coin is preferred). Wrap coin carefully.

## Finances Of Canada

Government Ended Year With Cash Balance Of \$53,000,000

Ordinary expenditures in 1931-32 were \$10,000,000 less than estimated, totalling \$378,700,000.

Ordinary revenues, greatly reduced by reason of lower yield from taxation, were \$327,700,000.

Deficit on ordinary account, 1931-32, \$51,000,000.

Expenditures not provided from income—Special costs, including unemployment and farm relief, \$18,000,000; capital, \$16,500,000; loans (non-active), \$3,300,000—resulting increase of debt, \$119,500,000.

Expenditures on unemployment and farm relief, 1931-32, \$38,250,000; wheat bonus, \$11,000,000.

Government ended year with cash balance of \$53,000,000.

Estimated expenditure—ordinary and capital in 1932-33, \$375,000,000, a reduction from the previous year of \$25,000,000 after absorbing an increase of \$12,700,000 in interest on public debt.

Controllable expenditures of the government on the usual services have under the estimates for 1932-33, been reduced \$35,000,000, or 20 per cent. from the previous year.

Revenues under existing taxation are estimated at \$310,000,000, and ordinary expenditures, \$358,000,000.

New taxation will, it is estimated, yield \$55,000,000, balancing current account and leaving a surplus of \$1,200,000.

Provision is not fully made from revenues for capital expenditures or for unemployment relief or railway deficit, although any improvement in business would be immediately reflected in increased yield from taxation and would correspondingly improve budget position on all counts.

## May Retire From Public Life

Stated That Lloyd George Will Devote His Time To Writing and Farming

David Lloyd George, one of Britain's greatest political figures, was reported recently to have decided on his virtual retirement from the House of Commons. Only events of outstanding importance, said those close to him, would bring the Welsh Liberal and war time prime minister back to the scene of his past triumphs. There was nothing on the political horizon now, it was added, that could be considered in that category.

Lloyd George, who, in his galvanic person during the war symbolized for many the British "will to win," whose oratory swayed the benches of Commons as had that of few men, will devote himself in the future to writing and farming, his friends said.

While continuing to feel that where Lloyd George is concerned the unexpected might always happen, commentators recently have pointed out that in the strict logic of events it was hard to see just what his place could be in the present political scheme.

## Will Exhibit "Flying Scot"

Those who do not expect to travel between London and Edinburgh next May may see in Chicago the "Flying Scot," fastest train in the world. The "Flying Scot" will be transported to the United States in 1933 with its full crew of British trainmen, complete with coaches, sleepers and dining cars and motive power, to be shown at Chicago's Century of Progress Exposition.

# No Other Boundary In World Of Such Length As That Which Divides Canada and United States

## Indolized Salt

Research Council Advocates Iodine Survey Of Food and Water Supplies

In the opinion of the Associate Committee on Iodized Salt, an advisory body of Canadian experts created by the National Research Council at the suggestion of the Canadian Medical Association and the Canadian Chemical Association, the widespread sale of endocrine preparations containing thyroid is inadvisable from the standpoint of public health, except under a doctor's prescription, and the sale of these preparations for the treatment of goitre and obesity cases should not be permitted.

The method of administering iodine in table salt is satisfactory but the proportion of iodine now used in iodized salt in Canada, one part in 10,000, is unnecessarily high. One part of sodium or potassium iodide in 200,000 would be sufficient and one part in 100,000 would be satisfactory as a maximum.

The committee suggests that if an iodine survey of food and water supplies in Canada is to be carried out, it should be undertaken by a national body such as the National Research Council. Consultation with the manufacturers of iodized salt by the National Research Council and the organization of research in association with the manufacturers was recommended.

A survey indicated that the sale in Canada of iodized salt is increasing, especially in the areas where goitre is prevalent. In these districts more iodized salt than free running salt is sold. According to the available statistics (not regarded by the committee as complete), goitre is practically absent in Nova Scotia and New Brunswick and quite uncommon in Quebec. In Ontario its prevalence is quite noticeable at Kingston, increases about the Muskoka district and in the vicinity of Windsor, still increases from North Bay to Cochrane and from Sudbury to Sault Ste. Marie, then diminishes again at Port Arthur and Port William. It has also been found to be prevalent in Saskatchewan in the vicinity of Prince Albert, while in Alberta and British Columbia it diminishes again, particularly at the coast. The committee has expressed its interest in the iodine survey of Alberta carried on by Dr. O. J. Walker, of the University of Alberta.

## The Thing To Value

Contention Men Make For Betterment Of World

This is an age and era when people are prone to collect money, and they are valued as they amass wealth. But we can see a change coming over the world. People are beginning to realize that it is not the wealth a man accumulates that is the thing to value, but the contribution made for the betterment of the world. People are beginning to realize that work of any kind for the public service and advancement, making the community better, is the real achievement.—General Smuts.

Many references at gatherings in Canada and the United States are made to the "4,000 miles of undefeatable boundary" between the two countries. As a matter of fact the boundary is 5,500 miles in length, of which 3,100 miles are land boundary and 2,400 miles are water boundary. The land boundary is marked by 5,183 monuments and a vista out through the woods in all forest covered areas; the water boundary is identified by 2,530 reference marks.

The monuments used in the several sections of the boundary are of several types and of different materials. In the mountains of Alaska and British Columbia hollow monuments of aluminum bronze are used; on the more accessible parts of the land boundary, the monuments are of cast iron, granite and concrete. Along the larger waterways the reference monuments are chiefly of concrete, and along the narrower waterways small solid aluminum bronze marks serve to mark the international boundary. Where necessary, monuments of a special type are used, for example, the Gulf of Georgia, the first course of the water boundary, which is eleven miles in length, is ranged by 718 towers carrying lights. The offshore tower in this case is sixty feet high.

Partly due to physical characteristics partly for historical reasons, and partly for convenience, the international boundary has been divided into eight sections. These sections are: (1) The Atlantic Ocean to the source of the St. Croix River; (2) the source of the St. Croix River to the St. Lawrence River; (3) the St. Lawrence River and Great Lakes; (4) Lake Superior to Lake of the Woods; (5) the 49th parallel from Lake of the Woods to the Gulf of Georgia; (6) the Gulf of Georgia and Straits of Juan de Fuca to the Pacific Ocean; (7) Dixon Entrance to Mount St. Elias; (8) 141st meridian from Mount St. Elias to the Arctic Ocean.

The boundary between Canada and the United States covers under the jurisdiction and administration of the International Boundary Commission. This Commission consists of two Commissioners, one representing Canada and one the United States. They are guided by five international treaties.

There is no other boundary in the world of such length on which no gun or armament is to be found.

## Alberta's Income Tax

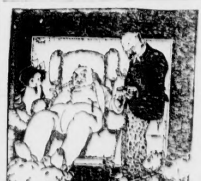

Provinces Expects To Derive Over Million In Revenue

Even office boys and clerks earning \$12 a week will contribute to the treasury of the Alberta Government through the income tax which is expected to net \$1,374,000 in revenue. Returns on 1931 incomes must be made by May.

Everyone earning \$15 a week who is unmarried will pay a \$3 living fee plus a 30-cent tax. Married persons with no dependents will pay the \$3 base tax and 60 cents income tax on income of \$30 a week.

Exemptions for single persons are \$750 and for married persons \$1,500.

Only single persons earning \$20 a week or more will be liable under both the Alberta and Dominion Income Taxes, with those earning that amount paying \$11.10 to the province and \$7.20 to the Dominion. Married persons must earn \$50 a week or more to be liable under both taxes, the amount of the taxes on that salary being \$14 to the province and \$4 to the Dominion.

"Your pulse is perfectly regular."  
"Nonsense. You are holding my wrist watch."—Die Muskele, Vienna.

## Members Will Support Agricultural Society.

Annual Fair to be Held on July 25th in Spite of the Fact that Provincial Government Withold Support.

The Didsbury Agricultural Society was organized 29 years ago. As all records were destroyed by fire in the year 1914, it is to be regretted that it is impossible to give an outline of the history of the Society.

For the past 20 years the Didsbury Society has made rapid progress. During the Great War much financial difficulty was experienced, but through the untiring efforts of the loyal support of the members it was possible for the Society to survive.

The Fair Grounds are located on the outskirts of this thriving town; a natural grandstand borders the east side, overlooking the entire grounds and from which a beautiful view of rich farm lands to the west, and in the distance the Rocky Mountains with their wonderful white caps extending above the horizon, can be obtained. The grounds are well improved, including a half-mile race track and a large space for athletic events. Good, substantial buildings have been erected for stock and other exhibits.

The Society has offered over \$2,000 annually for prizes. They have been competition in all classes.

Clydesdale and Percheron dominate in the horse class, although they have a good many light horses as well. In the beef and cattle class, Shorthorns and Herefords attract a great deal of attention. Holsteins and Jerseys are very prominent in the dairy class, also many entries are made in the sheep, hogs and poultry classes; in short, the livestock attraction is one of the best in the province of Alberta and has been highly recommended by the judges who are under the supervision of the provincial government. The Home Products and Fancywork classes must not be overlooked, as each year the spacious building reserved for such exhibits is filled to capacity with cakes, cookies, fruits, jams, also roots and vegetables. Fancywork and flowers are very daintily arranged, and on viewing these exhibits one realizes the ability and progressiveness of the lady members. In short, all the exhibits are in keeping with the richest mixed farming district in Alberta.

In addition to the exhibits the directors arrange a sports program which is held in conjunction with the Fair. The sports consist of horse racing, baseball, softball, foot-

ball and athletic events for the children.

The directors have set the date of Wednesday, July 27th for the Fair this year. Owing to the depression and the necessity of economy the provincial government did not pass the grants to the agricultural societies this year and in view of this it will be impossible for the society to pay cash prizes as heretofore and it has been decided to award ribbons only to the prizewinners; no entry fee will be charged and admission to 25 cents; no charge for automobiles and vehicles.

At a recent meeting of the directors the above ruling was thoroughly discussed and the decision to hold a fair this year was made after being assured of the support of every member of the Society, therefore the exhibits this year will be of the same quality and quantity as last year.

In conclusion we wish to impress upon the public that the fair is one of the most successful in the province of Alberta and we are sure that if you attend you will realize the richness of farm products of this district and you will also note the co-operation of directors and members which results in success, also you are assured of the day being instructive, educational and enjoyable.

## COME IN AND SEE HOW THEY WORK

*You'll learn why* **AIR CONTAINERS**  
*end tire troubles*

Pull out the seal—the air stays in. Air Containers seal punctures on running wheels.

A new idea...a new product...is sweeping the country. Air Containers! They seal punctures on running wheels...no more "flat" on the road. They make blowouts impossible. They add 30% to tire mileage. They make it unnecessary to check air pressure more than a few times a year.

They pay for themselves over and over!

Air Containers take the place of old-type inner tubes. Come in and see how they work!...Don't confuse them with so-called "puncture-proof" tubes. The patented feature of Air Containers make them seal punctures permanent.

Learn the facts and you'll join the hundreds of thousands who are saying goodbye to tire trouble!

We'll take your old tires in trade.

The patented cord insert, when compressed, instantly seals punctures. Air Containers seal the tire...often several times.

## Month of May Important In Red Cross Affairs

The month of May is one of outstanding interest in relation to commemorative dates of importance in their bearing upon human and social interests. The month begins with the celebration of Arbor Day, May 2nd; the birthday of Henri Dunant, founder of the Red Cross, on May 8th; Mothers' Day, the 2nd Sunday in May; Victoria Day, May 24th, and British Empire Red Cross Day, commemorated in honour of Florence Nightingale, on May 12th. This date is of peculiar significance to those engaged in Red Cross work throughout the Empire.

We are today commemorating throughout the British Empire, the birthday of a great English woman. On the 12th of May, 1820, in the city of Florence, Italy, was born Florence Nightingale, whose work and influence was destined to bring about a miracle of change in those fields of service which we may well characterize as the "humanities," a change not limited in its character, as is sometimes supposed, to the field of health or to the nursing profession, nor even confined within the bounds of empire, but so vital and far-reaching an influence, that we may say with truth that the life and work of Miss Nightingale was of world-wide significance in its contribution to the well-being and service of humanity.

It was fitting, therefore, as an outcome of the first British Red Cross Conference which gathered in London on May 19th, 1930, that the birthday of this great English woman should have been chosen as British Empire Red Cross Day, the 12th of May to be commemorated hereafter in honour of Florence Nightingale and the Red Cross organizations of the Empire. No more fitting commemoration for one whose personality and work was the inspiration which influenced the Swiss student, Henri Dunant, during the years 1859-1864 in the efforts which he made to bring about the first Geneva Convention, which resulted in the organizing of army medical and nursing services, and the formation of the great Red Cross Societies of the world. Dunant, the Swiss, acknow-

ledged his indebtedness to Miss Nightingale, and from correspondence which has survived, it is evident that both these world figures in the service of humanity, visualized even at that time an extension of Red Cross services beyond the realm of war into those activities which have taken their place in the peacetime program of the Red Cross today.

Today, the Junior Red Cross, embracing in its membership twelve million children, pledged to Red Cross principles of health, service and citizenship, organized in the schools of thirty-two countries, is demonstrating the vision held by this great English woman, while National Red Cross Societies are co-operating with government and health agencies of the world for the promotion of health and public welfare.

### Graded Beef.

While it is not possible for the smaller towns and villages, the beef supply of which comes from local slaughter, to have graded beef, it should be remembered that the food value and flavor come from the breeding and feeding of the animal. The specifications for graded beef can only be fulfilled by grain feeding.

Grading has commended itself to the purchasing public to such an extent that every month shows an increase of over the corresponding one of last year. In March, 1932, the consumption shows 2,250,104 lbs. as compared with 1,199,397 lbs. in the corresponding month of 1931.

We are approaching the period of short supplies, when farmers who find it possible to feed grain on pasture will find this a profitable method. Three or four pounds of crushed barley each day will be found satisfactory. For success, water is an absolute necessity.

### "24 HOURS"

The amazing saga of drama, suspense, romance and adventure that is tallied in the big cities of today, and most frequently is enacted all about us without our eyes and senses fathoming the everpresent clues and symbols, is projected for our benefit energetically and eloquently in the new photoplay being headlined this week at the Didsbury Opera House, Thursday, May 19, "24 Hours," a Paramount Picture.

As a novel and Cosmopolitan Magazine story called "Shattered Glass," this Louis Bromfield narrative of tangled lives and loves treated within two turns of the clock as modern New York sees it, proved highly attractive to entertainment purveyors.

With a cast featuring Olive Brook, Kay Francis, Miriam Hopkins, Regis Toomey and a number of other stage and screen performers equally talented, "24 Hours" was destined to succeed.

The story, for those who have missed the novel or serial, transpires from eleven o'clock night, to the same hour, a span of the sun and moon later. A man who has sought the solace of an affair with a nightclub girl to ever get the void of a straying wife, finds himself accused of his paramour's murder. The pressure of the social contacts of himself and wife is strangely turned to favor him, as he endorses his relationship with the slim girl. The scorned mate of the dead woman is brought to court for another crime, and unwittingly clears the accused. Freed of many incriminating shadows of the past, he is restored to his wife, whose own affair has gone on the rocks, and who is not without the sense to nurse the re-budding affection and trust of her mate.

George Barbier, Adrienne Ames, Charlotte Granville, Minor Watson, Lucille La Verne and Wade Boteler are castmates.

I have a real business concern at my house the other day? "Yes, the real company's truck broke down in our alley."

## MAC'S SERVICE HARDWARE

"A Friendly Place to Deal"

## A Little Community Spirit.

It has been demonstrated beyond all question of doubt by "Big Business" that co-operation is more profitable than competition. We seem to be slow, however, to apply the lesson, especially in civic affairs. When it comes to town improvement and community betterment we all have our own ideas, and most of us would rather see nothing done at all than to help with something about which we do not agree.

What is needed in every city and village is a community spirit, a spirit of goodwill and co-operation, and that is the thing which we lack here in Didsbury. "Every man for himself" seems to be our motto. The welfare of the community as a whole seems to be left sight of. We need to change our thinking, and instead of advocating what would benefit us most as individuals, we should be interested in what we will most help our town. We should also change our motto, so lost about this one: "If its for Didsbury I'm for it."

The co-operation of our merchants in these two big dollar days of May 21st and 23rd is a step in the right direction. It is, however, only a step. What this town needs (in our humble opinion) is a Board of Trade. Some time ago there was considerable sentiment in favor of such a move, even the U.F.A. passed resolutions favoring it. Eventually the matter was referred to a committee and that is the last that has been heard of it. This committee should get busy and make a report, or else the committee should be discharged and one appointed that will show more interest in the project.

A Board of Trade would bring about co-operation, not just once in a while, but all the time. It would be its business to be on the lookout

for everything that would promote the welfare of this community. Didsbury needs a larger payroll; we need industries so that our young people can find employment at home. Why should we be content to lose our most promising future citizens? Let us provide an opportunity for them here at home and conserve the potential wealth they represent. There is no reason why Didsbury cannot attract industries as well as other towns, if we will but show a little progressiveness and go-gettiveness.

We are asking "Is there no end to the depression?" Let us ask ourselves also "What are we doing to put an end to it?" Prosperity will not return of itself, we must do something about it. The organizing of a Board of Trade would at least be an effort to change conditions for the better. Those who have the welfare of this community at heart should get behind this movement and put it across. All that is needed is a little community spirit:

If you think your town is best—  
Tell 'em so;  
If you'd have it lead the rest—  
Help it grow.

When there's anything to do,  
Let them always count on you;  
You'll feel good when it's through,  
Don't you know.

If you're used to giving knocks—  
Change your style;  
Throw bouquets instead of rocks  
For awhile.

Boost your mayor and your town,  
Knock the knocker off his porch,  
Lift the stumbling from the lurch  
With a smile.

When a stranger from afar  
Comes along—  
Tell him who and what you are—  
Make it strong.

Never flatter, never bluff;  
Tell the truth, for that's enough.  
Be a booster—  
That's the stuff.

"Don't just tag along, have a little  
Community Spirit."

## When TEETHING makes HIM FUSSY

One of the most important things you can do to make a teething baby comfortable is to see that his bowels do their work of carrying off waste matter promptly and regularly. For this nothing is better than **CASTORIA**, a pure vegetable preparation specially made for babies and children. **CASTORIA** acts so gently you can give it to young infants to relieve colic. Yet it is always effective for older children, too. Remember, **CASTORIA** contains no harsh drugs, no narcotics, is absolutely harmless. When your baby is fretful with teething or a full upset, give a cleansing dose of **CASTORIA**. Be sure you get genuine **CASTORIA** with the name:

**CASTORIA**  
CHILDREN CRY FOR IT

## WORLD HAPPENINGS BRIEFLY TOLD

The Royal Canadian Mounted Police took over the policing of Prince Edward Island on May 1.

The highway programme of the government on relief road work cost approximately \$9,000,000.

E. C. Cox, of Lincolnton, S.C., is the winner of the Alexander Laird scholarship in English at Queen's University. It was announced.

More than 4,000 miles of roads in the national highway system of Italy were surfaced with bituminous dressing in the last 12 months.

The Duke of Connaught, Uncle of the King and former Governor-General of Canada, celebrated his 82nd birthday May 1, in his villa on the Riviera.

There is a possibility that R. H. Bannister, chairman of the Empire Economic Conference, leaves for the United States, Premier Ramsey MacDonald.

The new trade treaty between Canada and New Zealand was given approval by the New Zealand Parliament on the 11th, ratifying the same on the 12th.

A treaty to protect the northern Pacific coast of the United States through 1924, at a railroad convention between Canada and the United States, was announced by President Hoover.

A reportable drive against Communism in the Australian Government recently took a number of children from the houses of their Communist parents and placed them in state homes.

## Flood Sufferers in China Are Starving

Matter Brought Before League of Nations Manchurian Commission

News of more 6,000,000 Chinese flood sufferers in the Hwai River Valley north of Anhwei are existing chiefly on grass and bark, while some are being sold in a human market, was brought to the attention of the League of Nations' Manchurian Commission at Peking.

The affected area was estimated at twice the size of New York State.

The chief supply of food has been wheat from the United States. But owing to the trouble at Shanghai between the Chinese and Japanese and inconvenient transportation conditions only 4,000 tons of wheat thus far have reached the Hwai Valley. And Shanghai Peter Chuan, superintendent of the National Flood Relief Commission for the North Anhwei area.

It will be late in June before the wheat crop will have matured and the problem is to feed the starving millions, while the authorities do everything possible to improve transportation. Meanwhile, the refugees have been eating grass, weeds, sprouts and the bark of trees.

Relief workers reported to Chuan that the market price for the sale of human life is \$1 in Chinese money, or about twenty cents in American, for each year of the person's age. A ten-year-old child sells for \$10 or about \$2 in gold, the rate rising \$1 a year until the age of 25, when the price begins to recede.

## SHE HAD TO CRAWL TO BED

One stair at a time, on her hands and knees, that was how she had to do it. And when she did get to bed, her troubles were over.

Two months ago, I could not sleep on account of the terrible pains in my knees, and I could not sit in my chair. At night, I had to crawl up to bed, one stair at a time. But since taking Knudsen's Salts, I have entirely lost all pain and stiffness, and, if needed, could now go upstairs two at a time. In fact, I feel in years younger. I shall never be without Knudsen's Salts.

Do you know what causes these troubles? Nothing but sharpened uric acid crystals which form as the result of sluggish eliminating organs. Knudsen's Salts can cause be counted upon to clear these painful crystals from the system. The six salts in Knudsen are bound to dissolve away all traces of uric acid. And more! They ensure such perfect internal regularity that no such body poisons as uric acid are ever able to accumulate again. And this, too, for yourself by buying a bottle of Knudsen.

## Recipes For This Week

(My Betty Barclay)

### COFFEE GINGER COOKIES

- 1 cup strong, hot coffee.
- 1 cup molasses.
- 1 cup brown sugar.
- 1 cup shortening.
- 1 tablespoon baking powder.
- 1 tablespoon ginger.
- 1 tablespoon cinnamon.
- Flour for mixing.
- 1 teaspoon soda.

Dissolve soda in boiling water and stir into molasses. Pour over the shortening. Add boiling coffee and sugar, and then add molasses. Add flour until dough is stiff enough to roll. Roll and cut into desired shapes.

### ORANGE CANDIED SWEET POTATOES

- 1 cup orange juice.
- 1 cup grated orange rind.
- 1 cup water.
- 1 cup sugar.
- 3 tablespoons light corn syrup.
- 1/2 teaspoon salt.
- 1 cup butter.
- 6 sweet potatoes or yams.

Combine first seven ingredients and pour over peeled uncooked sweet potatoes arranged in casserole or baking dish. Bake covered in a moderate oven (375 to 400 degrees Fahrenheit) until tender, 30 or 40 minutes. Baste occasionally. Remove lid last 10 minutes to brown or put under broiler.

VARIATION: Just before removing from oven, add a layer of marshmallows and brown.

## What the automobile has taught women about household lubrication

Experience with motor cars has taught women that moving parts must be protected against wear by a film of oil. Many of them haven't learned, however, that moving parts of sewing machines, vacuum cleaners, lawn mowers, washers, and other mechanical devices must also be protected against dirt and rust.

3-in-One Oil not only lubricates; it also cleans and protects. It is different from all others, because it is a scientific blend of three high-grade oils: mineral, animal and vegetable. 3-in-One is the oil you should use on mechanical equipment if you want best results.

Don't risk your expensive household devices by using oil that does only half the job. Rely on the old reliable 3-in-One. It costs little more to buy and much less to use. At great stores everywhere. For your protection, look for the trade mark "3-in-One" printed in red on every package.

A Missouri editor writes a row to a newspaper, because in addition to the usual news, the paper prints a notice.

## Photo-Electric Burglar Catcher

Will Also Shoot Off Gas Intruder Says Inventor

Grid glow tubes and photo-electric cells are being brought into play to help catch burglars.

"Dick Dead-Eye" is the name given an instrument of tubes and cells which has been created by Dr. Philip Thomas, research engineer of Westinghouse Electric and Manufacturing Company. The apparatus is a network of infrared or ultraviolet rays thrown over a room to protect property.

The invisible rays are so arranged that interruption by an intruder causes the cells to turn on lights in the room and to sound a loud alarm.

They can also be made to give an alarm at the police station, unknown to the intruder.

Simultaneously with the alarm and lights, photographs may be taken by a camera hidden in the wall. The burglar need not know of this, as the infrared rays may also be utilized for the purpose and the intruder remain in apparent darkness.

Dr. Thomas explained that he had trapped himself several times successfully with the instrument and that the device had proved workable under various conditions. The photographs were ready for distribution within twenty minutes.

Possibilities of "Dick Dead-Eye." Dr. Thomas says, are limitless, as a burglar may, for example, be rendered senseless by an obnoxious gas or even shot down by an automatically operated pistol.

## Trying New Experiment

Scientists Will Endeavor To Test Atmosphere During Sun's Eclipse

Science will take advantage of a 99-second total eclipse of the sun on August 31, to check up on Professor Albert Einstein's theory of astral light deflection. Elaborate plans for the test, which will utilize all modern equipment possible, with aeroplanes and balloons taking a major part, were announced by Northwestern University, Chicago.

When the moon's shadow wipes out the sun's light for the few brief moments, balloons carrying optical instruments, and aeroplanes bearing additional delicate recording equipment, will be ready to meet the occasion over Freyburg, Mo.

Freyburg, said Dr. Oliver Justin Lee, Associate Professor of Astronomy, was chosen because forecasts indicate that the most favorable weather conditions will prevail there.

This will be the first time, Dr. Lee said, that science has ever undertaken to determine what happens to atmospheric pressure and temperature during the eclipse. If plans materialize, one of the astral expeditions' planes will climb 30,000 feet where clouds or haze won't interfere.

The full eclipse will sweep down from the Arctic region, across the Province of Quebec and the North-east corner of the United States. It will then pass over the Atlantic at Cape Cod.

## Britain Will Lead the Way

Finance Minister Says 1930

land On March 1st To Economic Recovery

"Of course England will lead the world in the march back to economic recovery," declared Gordon Sciffidge, finance minister, in a speech in the course of an interview at Toronto.

"England will be at the head of the parade just as in the past. It is character that does it. We are carrying tremendous burdens. We haven't a lot more money than we had a while back when things were at their worst, but we are on our feet."

## What Is Fame

What is fame? Upon the walls of the cathedral leading to the Parliament building at Ottawa, there are etchings of all the Prime Ministers of Great Britain. The other day, when two American visitors were walking down this corridor, one of them stopped, pointed his cane at the etching of Disraeli, and knowingly remarked: "Ah, George Arliss."

## Certain Is Right

Famous: Say, there's a bunch of people outside waiting to be presented to you. Among them is a bishop who says he married you some time ago.

Film Actress: Gee! I'm practically certain I never married a bishop.

## "DON'T BE ROBBED OF YOUTH!"

SAYS RALPH GRAVES

RALPH GRAVES  
Screenwriter

"Here in Hollywood," Ralph Graves, scenario writer, says, "women don't use birthdays as an excuse for growing old. They seem to know the secret of becoming more and more alluring."

The screen and stage stars usually keep that lovely irresistible glow that youngsters have. And lots of other women, these days, seem to have learned their complexion secret."

"Above all, guard complexion beauty," the stars will advise you. "Use gentle, soothing Lux Toilet Soap regularly as we do!"

Attresses the world over use fragrant, delicately white Lux Toilet Soap to keep their complexions always exquisite. In Hollywood, where 65% of the 694 important actresses are devoted to it, this fine soap is official in all the great film studios.

You are sure to love the way it cares for your skin. The caress of dollar-a-cake French soap for just 10c!

Plane Surprises Natives

Dayaks of Borneo Wanted To Know If Flying Machine Laid Eggs

The head-hunting Dayaks of Borneo were so intrigued at the sight of their first aeroplane that they wanted to know whether it laid eggs.

Richard Halliburton, of Memphis who is on a leisurely flight around the world, told the story to associates in New York in a cable from Medan.

The Tennessee flyer's message said he had arrived at Manila at the end of a 4,000-mile flight and had spent three weeks in Borneo with his plane, the "Flying Carpet," visiting the head-hunting Dayaks, who never had seen an aeroplane.

"Took the chief flying in native undress, except for goggles," the cablegram said. "Apparently his event to Dayak's history. War boats were filled with warriors who came 100 miles to see the chief fly. Dayaks asked if aeroplane laid eggs."

## Cried at Night

"Night after night, as soon as we would get settled in bed, baby would start crying. . . . BABY'S OWN TABLETS cured all this. What a blessed relief!" writes Mrs. Arthur Baker, Jr., Winona, Ont. Give Baby's Own Tablets for teething troubles, colds, fevers, colic. Also truly SAFE. 25c package.

Dr. Williams' BABY'S OWN TABLETS

The forests of Quebec cover an area of more than 155,000,000 acres are yielding to recent estimates.

## Burden of Taxation.

By H. LYNCH-STANTON.

The following is quoted from the Hamilton Review for April 15th, 1932:

"We are paying a dear price for this thing called Modern Civilization not only in the forfeiture of the serenity of life and its spiritual values, but in cold cash, in taxes, and the prospect holds little promise of relief. The chances are we shall have to keep on paying until the burden becomes a form of economic tyranny, and then something will crack."

"But the limit has been reached. To go beyond that is to venture where it is unsafe. We are taxed now almost to death, what with paying for the dead horse of past extravagances and trying to provide for present needs. Deficits are everywhere, in fact, modern life, Democracy, or call it what you will, appears to be one stupendous deficit with poor 'Mr. People' being picked clean to carry the load. Directly or indirectly he is the one who pays. But his lean cheek is pale, his eye is fevered with anxiety and his frail knees are trembling. Not much longer can he continue, like a scorpessed Atlas, to support this vast load of government machinery. Relief has got to come somehow and soon. The light and bland manner in which governments, municipal, provincial and federal, lay hands upon the people's money must cease. This 'giving the people what they want' must also cease. Taxes have become the bane of life, and government officials have got to economize and lighten the load."

I wonder how many of us realize how necessary this warning is and what the cost of government to each individual amounts to? The following figures will throw some light on the subject, they are those given for 1928. Since then there have been material increases in the debts of all our different governments. Following is first the bonded indebtedness on which we must pay interest:

Alberta Cities	\$ 60,649,909
Alta. Municipalities	33,428,850
Alberta Government	90,809,816
Share of Dominion Govt. bonded debt based on \$257.82 per capita and 1929 population.	144,509,194

Total \$359,187,771

All these bonds carry interest. Assuming that the average rate of interest is 5 per cent., the people of Alberta pay about \$18,000,000 in interest alone each year and for which they get no return.

Following is a statement of the taxes paid by the people of Alberta in 1928:

Paid Dominion Govt. (based on per capita rate of \$14.49)	\$ 26,734,356
Paid to Alberta Govt.	14,278,876
Paid to Alberta Cities	12,692,307
Estimate of amount paid mun./equalities, at least	10,000,000

Total \$ 63,705,439

You will see from this that the people of Alberta pay nearly sixty-four million dollars in taxes one way or another. This amounts to about \$102 for every man, woman and child in the province. Thirty per cent. of this amount goes to pay interest on borrowed money. The balance is used to keep up the elaborate system of government administration that we have built up to manage the affairs of our country.

These figures demonstrate the cost of government to the people of this province. Any move to reduce it should be heartily endorsed by the people who always pay in the end.

## COMFORT for COLICKY BABIES

### ... THROUGH CASTORIA'S GENTLE REGULATION

The best way to prevent colic doctors say, is to avoid gas in stomach and bowels by keeping the entire intestinal tract open, free from waste. But remember this: a tiny baby's tender little organs cannot stand harsh treatment. They must be gently urged. This is just the time Castoria can help most. Castoria, you know, is made especially for babies and children. It is a pure vegetable preparation, perfectly harmless. For years it has helped mothers through trying times with colicky babies and children suffering with digestive upsets, colds and fever. Keep genuine Castoria on hand, with the name.

*Dr. H. H. Fletcher*  
**CASTORIA**  
CHILDREN SAY FOR IT

## King George Refused Stamps For Collection

Royal Family Does Not Accept Gifts From Public

American admirers of George V. and his stamp collection, who have been sending His Majesty specimens of American issues, are advised through the Associated Press that he does not accept gifts of stamps. The Royal Family of Great Britain makes a practice of not accepting gifts from the public at home or abroad. What is more, with respect to proffered gifts of American stamps, George V.'s world famous collection includes only stamps of the British Empire. This explanation is timely. An American sent His Majesty specimens of a recent issue of commemorative stamps from this country and was peevish because they were not accepted. The story got into the newspapers and tended to convey the wholly erroneous idea that King George was unappreciative of the compliment paid him by the offer of the stamps. A statement of the Royal Family's practice in such matters should be sufficient to remove any such misunderstanding. Detroit Free Press.

By Annette

DELIGHTFULLY BECOMING TO  
THE HEAVY FIGURE IS  
SIMPLE STRAIGHT LINE  
DISS

Here are charming lines for the matron. And into the bargain, it is a very simple dress to fashion. The bodice is given a cross-hatch effect, so slanting through a neat inset vest, that scallops its outer edge. The skirt has two little panels at either side of the center-front, creating a center panel to give the figure height and grace.

It can be made with short or long sleeves, just as you please about it. Its very smart in printed crepe silk with plain contrast. There are many rayon novelties smart to fashion it for home wear. Short-sleeved styles are also available. Style No. 912 is designed for sizes 36, 38, 40, 42, 44, 46 and 48 inches bust. Size 36 requires 4 1/2 yards of 35-inch material with 1/2 yard of 25-inch contrasting.

Price of material 25 cents in stamps or cash note is preferred. Wrap own carefully.

## The Fanning Mill

Valuable Information Regarding Its  
Use and Operation  
(By H. G. L. Strange)

Seed drill surveys that have been made by the Dominion Seed Branch without a doubt that a vast amount of weed seeds and other impurities are seeded into the ground each year with average farming. Investigation further shows that most of this grain had been cleaned through fanning mills. The reason for these impurities being present in the seed is unquestionably due to the fact that it is very difficult to clean grain properly with the average fanning mill.

Based on the experience of many years of cleaning Registered Seed to the high standard of perfection required by the Seeds Act, the writer has worked out a method of cleaning seed with a simple fanning mill that will be found to be simple and effective.

In the first place only two screens are really needed for a fanning mill - a top screen that will scalp off large grains, pieces of straw and parts of unthreshed heads, and a smaller screen underneath that will allow the weed seeds, small cracked grains, etc., to pass through, leaving on top of the bottom screen only the large plump kernels required for seed. A fanning mill, using two good screens as described, will do just as good work as will those fitted with banks of screens perhaps better. Some of the large kernels, however, will be light, so that a strong air blast is necessary to blow them out. The mill should be turned at such a speed that will produce such a blast of air as will blow over at least 10 per cent. of the grain, then it is certain that all light kernels are being separated.

If a fanning mill would continue to operate in this manner no weed seeds or other impurities would be present in the final cleaned seed. Unfortunately the average fanning mill will not continue to work in this fashion for more than a few moments, the reason being that the screen, both top and bottom, particularly the bottom screen, very quickly plug up with small kernels, and so allow the weed seeds and impurities to pass over with the good grain.

Some fanning mills are fitted with devices that keep the screen clean, such as tapping hammers or travelling brushes. These devices, however, are very expensive and very few can afford them. A fanning mill without these extras can be made to do good work providing the operator will stop the machine at least every five minutes, remove the screens and carefully clean them with a stiff brush. If this is not done it is quite certain that most of the work of fanning grain will be wasted and that the seed will contain many weeds and other impurities.

Besides cleaning the screens frequently it is, of course, necessary to see that the grain is fed very slowly and evenly on to the screen, and that the machine is also turned evenly, but fast enough to produce, as mentioned above, a strong blast of air.

All grain should be put at least twice through the fanning mill in this manner, feeding slowly each time. It is the writer's experience that the capacity of most fanning mills is estimated by the manufacturers on a basis of grain cleaning for market rather than for seed cleaning. Most machines, for instance, that are listed at 25 bushels an hour, will do a good job on seed at about eight bushels per hour only, and if more is forced through it is at the expense of good work. The machine of course must be set level and should be applied or fastened solidly to a good stout floor and facilities should be provided to see that there is no chance scalping or screenings from either the screens or the wind because

## Cause Of Rail Wrecks Eliminated By Science

Canadian Discovery One Of The Most Important Research Advances In Years

Reducing the danger of train wrecks due to faulty rails to an absolute minimum, a new method of treating the steel used in rail manufacture, as developed by Canadian experts, is hailed as the most important improvement in this field to be announced in years.

Details of the research are announced by the Canadian Institute of Chemistry.

It has been known for a number of years that whenever a rail has failed or split due to what is known to engineers as a transverse fissure, or crack in the steel, microscopic examination of the faulty piece showed a variation of the same type of cracks in the centre of the mass of the metal. Engineers gradually became convinced that these cracks were the cause of split rails, but were unable to find a way of preventing them. It was observed that the same type of cracks, called "shatter cracks" by metallurgists, could be found in new rails that had never been in service, so it was concluded that they were produced during the preparation of the steel.

It remained for I. C. Mackie, well known Canadian metallurgist and Fellow of the Canadian Institute of Chemistry, working in the Sydney laboratories of the Dominion Steel and Coal Corporation, to discover the remedy. His process, considered by technical men the most important advance in recent years, consists in a special heat treatment of the metal. Usually, when the steel, red-hot, leaves the rolls in the rolling mill, it is cooled down fairly quickly, especially after it has reached what metal workers call the "black heat" stage - that is, when all redness has disappeared but the steel will just have a temperature of 500 or 600 degrees. Mr. Mackie discovered that it is at this stage that the minute cracks, which later result in failure of the tracks, develop, and he worked out a special way of treating the steel to avoid this trouble.

One of the present consists in cooling the steel down very slowly, so slowly indeed that it takes over 24 hours for a rail to cool by this method as against three or four by the usual procedure. Mr. Mackie and his colleagues have found that this treatment is a 100 per cent. cure for the troublesome "shatter cracks." A great advantage of the method is that it has no effect on the hardness of the steel.

Of course, as pointed by Mr. Mackie, rails made in this process have not yet been in service long enough to prove by practical test that they will not fail, but as all engineers are agreed that the failure is due to these minute cracks, and as the new process completely eliminates these cracks, it is reasonable to suppose that the rails will stand up better in use than those made in the ordinary way.

Canadian metallurgists consider this discovery to be of prime importance, and are gratified that while others have studied this problem for a number of years, its final successful solution was worked out by a Canadian.

ming mised with the good cleaned seed. Fanning mills with screens only separate according to the difference in width of kernel. To separate kernels of different lengths, that is to say, wheat from oats, etc., it is necessary to use what is called an indenting machine such as a Carter Die or an indent cylinder. The most perfect job of seed cleaning is offered by travelling or stationary plants in which the grain is first passed through a good fanning mill with a strong blast of air, then through either an indent cylinder or a Carter Die. The average fanning mill, using screens alone will not separate wheat from oats or vice versa.

## Radio On The Desert

Camel passengers crossing the Arabian desert may listen to radio selections from radios strapped on the backs of "ships of the desert." The camels are reported from Aden as bearing up well, even though loudspeakers are being placed near wells at regular stopping places.

## "YES, I AM 40 YEARS OLD!" says Irene Rich

How does this lovely star guard complexion beauty? Just as so many other Hollywood actresses do—66 of the 694 important ones! "I have used Lux Toilet Soap regularly for years," she says, "and am very grateful for it."

Surely you will want to try this fragrant, white soap. The caress of dollar-a-dozen French soap for 16c!

IRENE RICH and her two daughters (left to right) Frances, twenty-one years old, Julia, sixteen, and Irene, thirteen, are all lovely. Use of Lux Toilet Soap for years.

## Salada Reduces Tea Prices

Salada Tea Company Makes Important Announcement

An announcement of a price reduction has just been made by Salada Tea Company of Canada, Limited, amounting to 10 cents a pound. Mr. A. M. Wilson, manager of the company, who has been in Winnipeg for the past few days conferring with Mr. R. M. Gibson of Messrs. Gibson, Paterson, Limited, the company's western representative, has this comment to make on the new prices announced by his company:

"Teas are cheaper in the primary markets in London, England; Colombo, Ceylon, and Calcutta, India, although best quality teas have not declined in price to nearly the same extent as the lower grades. Nevertheless, the Salada Company, while rigidly maintaining the quality of its product, has reduced prices twice within the last two years, so that today the consumer is paying 25 per cent. less for this well-known product than he did in 1930. The price reduction had been contemplated for several weeks, but was postponed until after the announcement of the Dominion budget proposals in the House of Commons. Tea merchants expected a further tax on tea, but, as there was no additional import announced, they were able to make a downward revision of 10 cents on the pound, or 3 cents on the half-pound."

Four hundred pounds have been found that eat insects.

## Gas in the Stomach Is Dangerous

Recommends Daily Use Of Bisulphate  
Magnaesia To Overcome Trouble  
Caused By Acid Indigestion

Gas in the stomach accompanied by a full, distended feeling after eating are almost certain evidence of the presence of excessive hydrochloric acid in the stomach, creating acidity, "acid indigestion."

Gas in the stomach is dangerous because too much acid irritates the delicate lining of the stomach, often leading to gastritis accompanied by serious stomach disorders. Even further, it causes the distressing gas which distends the stomach and hampers the normal functions of the vital internal organs.

If in the worst of fully to perfect such a condition, it is to be avoided by the use of ordinary digestive aids which have no neutralizing effect on the stomach acids. Instead, use of the stomach acids, instead of four tablets in water right after meals, will drive the acids into the blood and blast right out of the body. Besides the stomach, utilizing the stomach acids and prevent its formation and escape from the stomach.

The Bisulphate Magnesia (the powder or tablet form) is a powerful and safe stomachic for stomach purposes. It is used to relieve the stomach and to keep the stomach in a state of health.

### Ontario Cancer Commission

Outstanding Experts Assist In Preparing Valuable Report

One of the most complete documents of its kind ever submitted to a government, the report of the Ontario Royal Commission on Cancer was published in printed form recently. The report was tabulated during the last session of the provincial legislature and the conclusions of the commission announced at that time.

Establishment of an Ontario cancer institute together with a research department, radio-uranium plant and three clinics—at Toronto, Kingston, London, Ontario—are among the principal recommendations of the commission, which visited eight different countries in a ten-month search for information.

Outstanding cancer experts in Canada, United States, Great Britain, France, Germany, Belgium, Sweden and Denmark co-operated with the Ontario commission and made available to the general public their conclusions, reached after years of painstaking research.

The commission was composed of Rev. Dr. H. J. Cody, Toronto, formerly Ontario Minister of Education; Prof. J. C. McLennan, distinguished scientist and former professor of physics at the University of Toronto; Dr. W. T. Connell, Kingston, bacteriological expert and former professor of the medical school at Queen's University; and Arthur R. Ford, managing editor of the London (Ont.) Free Press. Dr. John W. S. McCullough, chief inspector of health for Ontario, was secretary.

The number of reported cases had increased greatly, the commission finds, although this increase was partly due to the lessening of early-age deaths through advances in medical science. "Every person saved from death in youth becomes a potential victim of cancer in later years, and it seems certain there is a real increase of cancer in persons of the cancer age." The dangerous age, the commission finds, is 50 or over.

Shorn of its technical phraseology, the report advises immediate treatment as the greatest cure for cancer. It points out many people had the mistaken idea death from cancer was a disgrace, and recommends an educational campaign to remove ignorance of the general public.

"The earlier a cancer growth is recognized, the more likely it is to be purely local and amenable to treatment. Hence early recognition of cancer is of the greatest importance to both patient and doctor."

Scientists the world over were conducting research along various lines in an effort to find a sure cure for the disease, the commission reports, and "more progress along these lines is now being made in a single year than in any 10-year period previously." The importance of research is stressed. Research is the fundamental basis of all cancer work; the solution of the problem of cancer resides in the research laboratory, the commission concludes.

Some occupations are more dangerous than others, so far as cancer is concerned. The report lists the following occupations as the worst:

1. Work in tar, pitch and bitumen briquettes; 2. Work in mineral oil or paraffin or in any compound, product or residue of either of these products; 3. Work in arsenic; 4. Work in X-rays and radium; 5. Work in mines; 6. Chimney sweeping; 7. Work in aniline dye works.

Douglas' Egyptian Liniment should be in every household. Stops bleeding at once, counteracts wounds and prevents blood poisoning. Keeps away inflammation. Removes proud flesh.

The largest binder cannery in the world is slated to be one at Picton, Nova Scotia.

### What Might Happen

If the Glaciers Should Melt, Ocean Waters Would Deluge the Earth

Just raise the average temperature of the earth two or three degrees and you can bid good-bye to all the big cities on earth. Glaciers will melt and oceans will rise, and—

But let the weather men get in on this. Dr. William J. Humphreys, of the United States weather bureau, took a lot of evidence to make up the painstaking case, presented to the American Meteorological Society, that the earth's glaciers, if melted, would raise the ocean level 150 feet, and that the aforementioned slight increase in warmth would do the melting.

One could still be dry above the 15th floor level in cities with skyscrapers, but all about would be the bounding waves. London, Paris, New York, Montreal, Philadelphia, Los Angeles, Washington, Shanghai—all gone.

By way of cheer, Dr. Humphreys pictured the world as delicately balanced between this catastrophe and the equally cheerless prospect of another glacial period. It would take but a drop of five or six degrees in the earth to bring back the ice age, with Canada and the United States no far south as Kentucky and Iowa one vast skating rink.

But skating enthusiasts needn't cheer. Dr. Humphreys said the earth is gradually growing warmer and the next ice age, although forecast, is some millions of years off. So, probably, is the glacial melting period.

### THE RHYMING OPTIMIST

By Aline Michells

#### THE RICHEST HOUSE

This little house is very rare  
And very poor and old,  
Its tenants live on meagre fare  
And suffer cold.

Sometimes a passer feels concern  
For those who dwell inside,  
And wonders if they do not yearn  
For wealthier life.

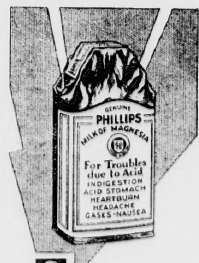

Oh, eyes that stare and do not see,  
Oh, heart that holds no dreams,  
Yours is the house of poverty  
And where no joy gleams!

This little house is very cheap  
And very dim and small;  
Yet here peace lulls to happy sleep  
And faith cheers all.

And here dwell love and song and mirth  
And every kindest grace;  
Perhaps the richest house on Earth  
Is this poor place!

The Chinese population of California is estimated 37,000.

Living costs in Germany are dropping.

### SOUR STOMACH

JUST a tea-spoon dose of Phillips' Milk of Magnesia in water. That is an alkali, effective yet harmless. It has been the standard antidote for 40 years. One spoonful will neutralize at once many times its volume in acid. It's the right, the pleasant and efficient way to kill all the excess acid. The stomach becomes sweet, the mott deposits. You are happy again in five minutes.

Don't depend on crude methods. Find the best way yet evolved in all the years of searching. That is Phillips' Milk of Magnesia. Be sure to get the genuine. The ideal dentifrice for clean teeth and healthy gums is Phillips' Dental Magnesia, a superior tooth paste that safeguards against acid-mouth. (Made in Canada.)

THE woman who lets headaches upset her plans must have her eyes and ears closed to certain facts about Aspirin. There is always swift comfort, and never any harm, in Aspirin tablets. Doctors have said so; men and women everywhere have found it so. Any headache—from any cause—is always relieved by one or two tablets. And lots of other aches and pains. Neuralgia. Neuritis. Rheumatism. Naging pains. The pain from colds which make you "ache all over." Sore throat. Systemic or "muscular" pain. Aspirin can spare you days of needless suffering! Be sure you get Aspirin—not a substitute!

**ASPIRIN**  
MADE IN CANADA—TRADE-MARK REG.

### No Margin For Errors

Law Of Sea Much Stricter Than Law On Land

Because he did not work out a correct course, a court of inquiry has declared that the captain of the Canadian liner, "Prince David," which ran on a reef near Bermuda, is "incompetent," and to blame for the accident. Other officers share the blame. The captain may lose his certificate—his "diving license."

One can easily be wiser after an event, and it is easy to find cause of blame for an accident at sea. The law of the sea is inexorable. It does not allow a margin for human error. A captain must do exactly the right thing, or he is held guilty.

Perhaps it is right that this should be so. The consequences of an accident at sea may be too terrible to admit of laxity on the part of the man responsible, and for leniency on the part of the men who investigate the affair. Censure must be so severe that it will serve as a warning to others to make sure that the safety of several hundred people and of a ship costing millions of dollars, is as certain as human agency can make it.

There is no room for mistakes at sea. Yet people on land are allowed to drive cars on the highway, they can make mistakes that land their cars in the ditch, or knock somebody down, and a court seldom finds a motor driver to blame.

If the law were as strict, and a driver's license taken away from him after an accident, to the cause of which he had contributed, there would be very few automobile accidents at all.

There were 29 people killed on the Ontario highways in March. There will be many more killed during the motoring months of April to October. But just make the laws of the land as strict as the laws of the sea, and there will scarcely be a fatality anywhere. St. Thomas Times-Journal.

Mothers Value This Oil—Mothers who know how suddenly young may seize their children and how necessary prompt action is in applying relief, always keep at hand a supply of Dr. Thomas' Eucalypti Oil, because experience has taught them that this is an excellent preparation for the treatment of this ailment. And they are wise, for its various uses render it a valuable medicine.

Archaeologists excavating the market place of Athens hope this year to bring to light the Senate House and the Temple of the Mother of the Gods.

None are perfectly happy but philosophers, children and fools.

New York state contains 49,204 square miles.

### Little Helps For This Week

"And now I exhort you to be of good cheer"—Acts xviii, 22.

Make me as one that casteth not by day  
A dreary shadow, but reflecting eye.  
One little beam, loved, warmed, and  
Golden caught.  
From the bright sun that lights our  
Daily way.

You find yourself refreshed by the presence of cheerful people; why not make earnest efforts to confer that pleasure on others? You will find half the battle is gained if you will never allow yourself to say anything gloomy.—Lydia M. Child.

### ACID STOMACH IS DANGEROUS

Suffers From Indigestion CUT THIS OUT

"Stomach trouble, dyspepsia, indigestion, sourness, gas, heartburn, food fermentation, etc., are caused also, times in ten by chronic acid stomach," says a well known authority.  
Burning hydrochloric acid develops in the stomach at an alarming rate. The acid irritates and inflames the delicate stomach lining and often leads to gastritis or stomach ulcer. Don't dose an acid stomach with irritants, or artificial stimulants that only give temporary relief from pain by driving the acid fermenting food out of the stomach into the intestines.

Instead, neutralize or sweeten your acid stomach after meals with a little Bismuth Magnesia. And not only will the pain vanish but your meals will digest naturally. There is nothing better and active acid stomach. Your stomach acts and feels fine in just a few minutes. Bismuth Magnesia can be obtained from any reliable druggist. It is either powder or tablet form. It is safe, reliable, easy and pleasant to use. It is not a laxative and is not at all expensive.

Idle Money Earns Nothing  
When Waterloo Bridge in London, England was built 129 years ago several sovereigns were buried in a black gravel forming part of it. When this bridge is pulled down each of these sovereigns will be worth 27s. 6d when recovered but if they have been invested each of them would now be worth about 100 pounds.

The last session of U.S. congress saw the introduction of 6,041 bills.

### There is NO ODOR from FISH

or from Vegetables cooked in CANAPAR

Boiled, or steamed, fish comes out firm and solid, swimming in its own juice, when you seal it up in Canapar Cookery Parchment. No fishy odor. No gummy stews or sauces pan to clean out afterwards.

And vegetables are simply delicious. Using Canapar you can cook three at once in the same pot over one burner turned low. Canapar acts on them as it does on fish. Retains all the mineral salts and flavor.

Fat and juices from meat won't burn if you line your roasting pan with Canapar. No pan-crusting after roasts.

Canapar only costs 25 cents for a large envelope. You can use each sheet repeatedly because it won't absorb odors. Makes a perfect dish cloth because it is silky, strong, and doesn't shed lint.

#### Special Offer

CANAPAR is made by the makers of the famous PARASAM Heavy Waxed Paper in the Green Box. Most grocers, druggists and department stores have Canapar on sale. But if you haven't send coupon direct to the makers and we'll give you a new and unique book entitled "Leftovers," containing one hundred recipes as a bonus for your trouble.

Enclosed find 25c for which please send me one full size package of CANAPAR COOKERY PARCHMENT and your 100 recipes for "Leftovers."

## Glimpses of the Past.

### 28 YEARS AGO.

Mr. Walter Durrer, of Midway, Ont. arrived last week. Mr. Durrer intends opening up a photograph gallery here. He comes highly recommended in this line.

The overseer wishes to inform the local sports that the practise of playing football on streets has to be stopped.

### 25 YEARS AGO.

April 9th—King Hiram Lodge, A.F. & A.M. was consecrated and the officers installed by the Most Worshipful Grand Master A. E. Taylor, of Edmonton.

May 17—Mr. Weber has the excavation started for the mill and is busy drawing stone for the foundation.

May 17—Didsbury Markets.  
Steers ..... 4 1-2c  
Hogs ..... 87.00  
Butter ..... 25  
Eggs ..... 48  
Potatoes ..... bushel  
Oats ..... 25  
Wheat ..... 61  
Barley ..... 28

### 20 YEARS AGO.

May 22—Miss Erta Reitzel was the lucky winner of a fine piano at the recent contest carried on by the Calgary News-Telegram.

The new town firebell was put up on Monday. It is much better than the old one, having a better tone and easier to ring.

May 29—The bandstand for the park on Railway Avenue will be started in a day or two, the ground having already been staked out.

A recent issue of the Overseas Daily Mail published in London, England contained an account of the formation of a branch of the Overseas Club in Didsbury.

### FIFTEEN YEARS AGO.

May 23—Dr. Clarke had the misfortune to lose his satchel of surgical instruments while crossing the Dog Pound Creek on the blind line a few days ago. The bridge, which was washed out, and the water being high, it is supposed that the satchel was swept out of the buggy by the water and lost.

May 23—Mr. H. B. Atkins received the Liberal nomination, and Mr. L. Tilton the Conservative nominations for the provincial legislature. Mr. Atkins won by a majority of 116 of the polls.

The conscription bill was introduced in parliament.

### 10 YEARS AGO.

May 3—Mr. John Sick, while driving into town with a load of logs on Monday, had the misfortune to get thrown from the wagon. The accident occurred in front of Mr. Ausenhus' farm and help was soon forthcoming. The cause of the accident was that the logs objected to a free ride, trying to jump out of a triple box wagon and that Mr. Sick overbalanced himself in trying to persuade them into a better frame of mind.

May 17—Mr. O. L. Spencer and Mr. C. Hayden, of the Herald staff motored up from Calgary with a Herald Receiving Radiophone and proceeded to give the first public reception of radio in Didsbury.

Mr. Wm. Hansperger has resigned his position as Postmaster.

### WEEKLY SERMONETTE

"Trials, if very heavy, kill little people, but they make great ones."

The accident which occurred in the district might have proved serious, when Mr. Kendrick's car went over the bridge by Geo. Young's place. We are very glad that Mr. Kendrick was not hurt.

### Mountain View Notes

A nice shower of rain fell Friday evening and many fields of wheat are showing the results.

Several residents have been unfortunate enough to be confined to their beds, owing to severe attacks of 'flu, which seems to be prevalent. This time of the year one needs to be up and around and the sick folk have found it very inconvenient to be laid aside, even for a few days.

Monday evening, May 9th, Mr. Norman Priestley, Vice-President of the U.F.A. gave a very interesting talk in Community Hall on "Co-operative Buying." Didsbury East Local went on record for forming a local co-operative buying association along with the help of other Locals. The meeting was well attended, representatives from Lone Pine, Carstairs and Didsbury being there. A meeting is to be held at Didsbury June 11th to discuss the question, and all members from any Locals are urgently invited to attend.

### Melvin Notes

Mrs. John Clarke and Mrs. Lloyd Chandler spent Thursday afternoon at Mrs. Hessegood's.

Mr. and Mrs. Lloyd Chandler were recent visitors at the home of Mr. and Mrs. Clyde Ruby.

Mr. and Mrs. Roscoe Irwin were Sunday visitors at the home of Mr. and Mrs. Glen Johnston.

Misses Marion and Ruth Johnston accompanied by Ranold, spent the week-end at Three Hills with their sister, Mrs. Ed. Vetter.

Mr. and Mrs. Emil Krebs, and daughter Lois, Ross Youngs, Leslie Oliver and Frank Kynel were Sunday guests at the home of August Krebs.

Mrs. Chas. Youngs who has been ill for some time is now at the home of Peter Johnston, Ruth Johnston nursing her, her patient showing much improvement.
